NOTE ON ECONOMIC INVESTIGATIONS IN THE AURANGABAD DISTRICT 1339 FASLI

Except to the north-west in the Kannar Taluqa, there is no natural barrier (unbridged rivers or mountains) separating the Aurangabad District from adjacent British and Hyderabad territory. Ahmednagar, Nasik, Khandesh and Berar constitute some of the most advanced divisions of British India : Bhir and Parbhani to the south and south-east of the District are rather backward regions. Some of the figures contained in the reports on the twelve villages, might throw some light on the question as to how far the people of Aurangabad District have been influenced for the better or for the worse by the neighbouring population. The head-quarter towns (District and Taluqa) are all suitably situated for administrative purposes : Kannar town is nearer Aurangabad city than some of the villages to the north of the Taluqa, but this north-western strip is hilly, sparse in population and backward on account of lack of means of communication. Bhokardan Town is the only Taluqa head-quarter yet to be connected by road to the District head-quarter. Economically, the eight taluqas do not differ much as among themselves : the four southern taluqas appear to suffer from frequent famines on account of failure of rain.

2. In consultation with the First Taluqdar of the District and the 8 Tahsildars, the marginally noted villages were selected for detailed economic inquiry (Table I). Bun Kinola, Sarnapur and Siri Saigaon have road facility : the first is located along the Aurangabad-Ajanta road, the second and the third are respectively near the Aurangabad-Dowlatabad and the Gangapur-Lasur roads. The other nine villages were chosen as representative of the interior, and the tours of the economic inquiry staff, covering the different portions of the District are shown in the accompanying District map. Apart from the railway and the P. W. D. road journeys, the tours of the economic inquiry

NOTE ON ECONOMIC INVESTIGATIONS IN THE AURANGABAD DISTRICT 1339 FASLI

Except to the north-west in the Kannar Taluqa, there is no natural barrier (unbridged rivers or mountains) separating the Aurangabad District from adjacent British and Hyderabad territory. Ahmednagar, Nasik, Khandesh and Berar constitute some of the most advanced divisions of British India : Bhir and Parbhani to the south and south-east of the District are rather backward regions. Some of the figures contained in the reports on the twelve villages, might throw some light on the question as to how far the people of Aurangabad District have been influenced for the better or for the worse by the neighbouring population. The head-quarter towns (District and Taluqa) are all suitably situated for administrative purposes : Kannar town is nearer Aurangabad city than some of the villages to the north of the Taluqa, but this north-western strip is hilly, sparse in population and backward on account of lack of means of communication. Bhokardan Town is the only Taluqa head-quarter yet to be connected by road to the District head-quarter. Economically, the eight taluqas do not differ much as among themselves : the four southern taluqas appear to suffer from frequent famines on account of failure of rain.

2. In consultation with the First Taluqdar of the District and the 8 Tahsildars, the marginally noted villages were selected for detailed economic inquiry (Table I). Bun Kinola, Sarnapur and Siri Saigaon have road facility : the first is located along the Aurangabad-Ajanta road, the second and the third are respectively near the Aurangabad-Dowlatabad and the Gangapur-Lasur roads. The other nine villages were chosen as representative of the interior, and the tours of the economic inquiry staff, covering the different portions of the District are shown in the accompanying District map. Apart from the railway and the P. W. D. road journeys, the tours of the economic inquiry

11. Borsar Bezurg	Kannar
12. Khadkheda	do

staff along country tracks and across fields covered 401 miles (the actual mileage of journeys within the District having exceeded 1.250 miles).

3. The inquiry took about 3 months from about the middle of Isfandar to about the middle of Khurdad. The collection of data and satisfactory verification thereof on the spot directly by the special officer and his staff was throughout the inquiry given first importance. The data of each village are attached to the report thereon.

Landholdings.

4. Leaving aside jagirs, etc., most of the landholders belong to the middle and lower classes : land is not monopolised in the hands of a few, though the proportion of landless families to land-owning families is by no means negligible. The total area of the 12 villages is acres 24,367-1, of which acres 19,388-27 is dry land and acres 651-12 is garden land. There is no wet land. This dry and garden acreage is shown in the land revenue records against 440pattadars. But in 75 pattas, neither the pattadar nor his heirs respectively hold any portion of the lands shown against the pattas. The actual number of occupants, however, is 731. Three occupants hold garden land only, and 728 dry landholders occupy in addition 183 garden holdings. Sizes of average holdings (dividing dry, and garden areas by the number of occupants of dry, and garden land respectively) in each village are noted in (Table II). Taking all the 12 villages together the average dry land and garden land holding work at acres 26-25 and acres 3-22 respectively.

TABLE II.

Village	Size of average dry land holding	Size of average garden land holding
1. Sarnapur	.. 44-24	1-10
2. Bun Kinola	.. 14-37	3-11

Khadkheda	..	16-18	..		0-25
Taking all the 12 villages together	..	26-21	..		0-36

This average should admit of a margin of saving.

5. The total number of families resident in the 12 villages is 982. Landholders number 556 while 426 have no agricultural land. If the total dry and garden area were to be divided equally among all the resident families, each family would get acres 19-30 dry land and 0-27 garden land. This average per resident family coupled with the fertility of the soil which is of a fair standard, warrants the opinion that there is sufficient land for the population to maintain a good standard of life.

6. The table given below (Table IV) shows the classification of land-holders according to sizes of holdings. Occupants having 100 acres and more each, number only 33 while those holding less than 15 acres number 366. While big landholders are few, families having insufficient extents of land are about 50 per cent. of the total number of occupants; that is, of 982 families, 426 have no land and out of 731 occupants 366 have insufficient land.

7. Of 731 landholders, 170 are non-cultivators and 561 are cultivating occupants. Twenty-four of the 170 are sowcars, 4 merchants, 6 village officers, 57 engaged in other occupations and 79 are mere rent receivers. Table V shows that the majority of occupants holding 50 acres and more cultivate their lands. Seventy-four of the 561 cultivating occupants have subsidiary professions like carpentry, weaving, sheep-farming, etc., while 487 depend entirely on cultivation.

TABLE V.

holding	Total No. of occupants		Cultivating occupants

50 ,,	..	43	0	32

8. There is no tank irrigation. A high percentage of land assessed as "garden" is irrigated from wells which are generally maintained by the raiyats in good condition.

9. Competition for agricultural land is keen throughout the District. Table VI. shows that it is only in Sarnapur that the value of land is low as the soil is very poor. In the southern and western Taluqas, the price of agricultural land is higher on account of an increasing desire on the part of sowcars and merchants to become landholders.

TABLE VI.

Village	Current price of an average acre of	
	dry land	garden land
	B.G. Rs.	B.G. Rs.

11. Borsar Buzurg	.. 120 to 200	..
12. Khadkheda	.. 60 to 80	90 to 110

10. Acres 5,615-7 dry land and acres 188-26 garden land (constituting 28.9 and 28.9 per cent. respectively of the total dry and garden land areas of the 12 villages) passed hands during the past 25 years. Transfers of land on account of inheritance and partition are not included.

Table VII shows that about a third of the land was transferred by regular sale and slightly less than 10 per cent. by mortgage with possession. By "oral mortgage and formal sale" (explained in the report on village Khupta),* more than 40 per cent. was secured, and the total area acquired through debt transactions exceeded 50 per cent.

Total area acres ..	5615-7	188-26

*The following is an extract from the report on village Khupta, explaining the process of oral mortgage and formal sale.

"In the majority of cases, the transaction invariably began with the raiyat borrowing money from the sowcar. A few years after, inspite of payments made annually by the borrower, the sowcar would get renewed thumb impressions for larger and larger amounts, and finally threaten to drag the fearing raiyat to court. The "compromise" to which the borrowing, *believing* raiyat would readily agree was to execute a "*bynama*" *selling in all legal solemnity* all his lands to the sowcar, which *bynama* was invariably registered. In every one of these cases, the lender solemnly assured the borrower that the sale deed was only nominal—just to persuade the borrower to clear off his debt as quickly as possible—and that the land would be released *at any time* the borrower repaid the amount. For this assurance the seller was not given any written promise: it was "thondi" or oral promise. But, said the money-lender, he would not expel the raiyat from his lands: he could remain there as long as he liked, provided year after year he paid to the sowcar amounts of money due to the latter on account of, the loan as the raiyat thought, the land as the sowcar really meant. Each of these raiyats, originally holders, now reduced to tenants on their own original holdings, executed in favour of the sowcar a *kabuliath* undertaking to cultivate the concerned land as tenant, this *kabuliath* being renewed every year. The amount paid every year by the deceived raiyat is considered by him as interest on the loan due from him to the sowcar, but the sowcar takes it as tenancy due based on the annual tenancy agreement. Some years pass like this, and after this, the sowcar quietly goes (as he has gone in a number of cases at Khupta) to the court of law, produces the document, gets a decree authorising him to get possession, and suddenly faces the concerned cultivator with the threat of immediate expulsion unless he agrees to give up all talk of occupancy

11. Table VIII gives below details from and to which classes of population how much of land was transferred, taking cultivation as the test. The transfer to occupants actually cultivating the land amounts to acres 3617-32 dry land and acres 99-19 garden land while the transfer to non-cultivating occupants is acres 1997-15 dry land and acres 89-7 garden land. The transfer from cultivating classes to persons belonging to non-cultivating classes and not actually cultivating (acres 1582-5 dry land and acres 78-5 garden land) is slightly more than the acreage transferred from non-cultivating classes to persons belonging to cultivating classes and actually cultivating at present (acres 1338-29 dry land and acres 9-25 garden land). The tendency for land to go back to the tillers of the soil is clearly there, though the tendency towards increasing absentee landlordism is predominant. The transfer to persons belonging to cultivating classes but not actually cultivating at present is negligible. The fact that acres 645-3 dry land and acres 26-37 garden land was taken up by persons belonging to non-cultivating classes but actually cultivating at

rights and continues strictly as a tenant. The raiyat has absolutely no other go, and the last stage (which has begun in some cases) is for the new non-cultivating occupant to increase his rent once in 2 or 3 years.

Three of the big landholders (two non-cultivating and one cultivating) whose possessions are due to accumulations of this sort, were asked to explain what they meant by this surreptitious process, why they allowed the raiyats to continue to believe that they had occupancy rights even after execution of sale deeds. Two said that it was a process of self-deception on the part of the raiyats for which they (the sowcars) were not responsible: the third said that he was ready to return the lands if all the principal and interest due was repaid, but not one of the concerned raiyats could pay.

The real explanation for this long spreadout process of dispossession lies in

- (1) the readiness of the illiterate raiyats to believe in the honesty of every man, and thus to attach thumb impressions to every kind of document without ascertaining the terms thereof: many of the sale deeds are for impossible prices neither earned nor paid but accumulated in account books.
- (2) the anxiety of the land-grabbing sowcars to maintain the high price of the land ill-gotten by themselves, by having the land well cultivated: that man would do it best who was the cultivating occupant before: the new occupants are as a rule non-cultivators, mere rent receivers; and
- (3) their concern to avoid anything like public obloquy annoy the villagers: expulsion of one of their fellows from his land would probably result in the raiyats making common cause against the outsiders".

present, shows that cultivation of the land is being taken to more and more by non-cultivating classes.

 „ 188-26 garden land.

12. Table IX shows that between 15 and 11 years ago there was a steep rise in land transfers, and from then to now there has been an increase though more gradual. The same table shows that such transfers are in comparatively small blocks, that is, from small raiyats.

13. In 86 out of 289 cases, raiyats dispossessed of their respective lands by the O. M. F. S. process or on account of other debt transactions, are now cultivating land on tenancy terms. The area so cultivated in these 86 cases is acres 1,141-6 (including dry and garden land). This constitutes 19·6 per cent. of the total transferred area, 22·2 per cent. of total area cultivated on tenancy terms (namely, acres 5,130-23) and 35·5 per cent. of total acreage transferred on account of debt transactions (acres 3,212-11). That is, more than a third of land lost by the raiyats on account of debt transactions, is being cultivated by themselves on tenancy terms. This should not have been the case were they willing to sell their lands and to give up cultivation. These data justify the consideration by Government of the advisability of introducing a land alienation act in the Aurangabad District, or (if the data are considered inadequate) getting more data preliminary to such consideration.

14. The process of "oral sale and real tenancy" (explained in the report on village Hingoni) is prevalent in the western and southern taluqas, but it is yet too soon to say if these cases will really result in transfers. For the purpose of this inquiry, these are taken as tenancies.

15. Acres 735-20 is fallow in the 12 villages. The main reason for this is land disputes.

Fallow land.

Agricultural Tenancies.

16. Acres 4,998-10 dry land and 132-13 garden land (comprising 25·8 and 20·3 per cent. of the total dry and garden land areas respectively) are being cultivated by tenants. Tenancy contracts number 265 and only 37 are landless tenants, that is, tenants not having their own occupancy holdings. In 87 of the tenancies, rent is paid in kind, in 109 in money, in 68 partly in money and partly in kind. The terms of one tenancy are not ascertainable, as both the landholder and the tenant live in British India.

17. There is keen competition for securing agricultural tenancies and the tenancy dues are higher in the south-western and western taluqas. Taking into consideration tenancies in which rent is paid only in money, the annual rent per average acre of land works at B.G. Rs. 6-5-4 at Khupta, at B.G. Rs. 3-14-10 at Sipora jadeed (the soil is rather poor here), at B.G. Rs. 10-3-2 at Siri Saigaon, at B.G. Rs. 5-2-8 at Hingoni, and at B.G. Rs. 21-5-6 at Borsar Buzurg. The acreage let out on money rent at Borsar is only 15-10 for which particular fields there is special demand. As mentioned below, a high majority of these tenancies are annual contracts which involve constant fear of ejection, minimum maintenance and no land improvement whatever.

18. One hundred and ninety-six are tenancies at will, 14 are contracts for 2 years and more, 54 are contracts for 5 years and more (excluding one case mentioned above, in which information cannot be had).

Agricultural Labourers.

19. Three hundred and sixty-eight families (out of 982) having neither occupancy nor cultivation holdings. Of these, 33 are dependent families, the heads of 97 families are skilled labourers, and 238 families comprise un-skilled labourers.

20. The general wage-level prevalent for un-skilled labourers is mentioned in each of the village reports. Money wages are more common than wages in kind, and the wage-level is fairly high throughout the District, ranging between 5 and 8 annas B.G. per day per adult labourer, and between 2 and 4 annas B.G. per day for women coolies.

Land Mortgage Debt.

21. There are many Co-operative Credit Societies along the railway line and roads, but comparatively a small number of villages off the road and railway have primary societies of their own. In docility and even literacy, Aurangabad raiyats are better than their fellows in several other Districts of the State, but little of touring and inspection has been done by officers of the Co-operative Credit, and Commerce and Industry Departments in the District as a whole. In some villages as at Siri Saigaon, Societies have been wound up by the raiyats on account of finding them unsuitable: they now depend entirely on their respective sowcars once again, after being charged heavy penalties for their temporary dis-loyalty. There is no organized market (as in the Berars) for the disposal of agricultural produce. At Aurangabad, Jalna, Fardapur, Lasur and Rotegaon, processes of sale and purchase of *kapas* are the same today as they were 15 years ago.

22. The following changes were made in the inquiry with regard to debts, in the Aurangabad District :—

1. each borrowing of a family was taken as a unit while in the Nanded and Warangal Districts the debt of each family was taken as a unit;
2. whether a borrowing was accompanied by a registered document, a stamped deed, an agreement written on plain paper or oral assurance was inquired into; and
3. when accounts were settled last in each borrowing, was ascertained.

23. Sixty-two land mortgages comprise acres 931-36 dry land and 27-2 garden land. The present value of this land is estimated at B.G. Rs. 72,965, and the mortgage debt stands at B.G. Rs. 22,338-9-0 and O.S. Rs. 7,234-15-10. The total O.S. value of this debt comes to Rs. 33,296-10-4. The debt is 38·9 per cent. of the estimated value of mortgaged land.

24. Table X gives the different kinds of mortgages.

TABLE X.

Mortgages with possession.

(c) with minimum period stipulated ..	2
(d) involving free redemption after a stipulated period	5

Simple mortgages.

(a) ordinary	18
(b) with conditional sale clause attached ...	6

25. Thirty-seven mortgages are recorded in registered documents, 19 on stamped paper and 3 on plain paper. Two are oral mortgages and in one case the nature of the document is not ascertainable.

26. The rates of interest levied in the 24 simple mortgages are 24 per cent. in 9 cases, and 12½ per cent. in 9 cases. Six are instalment loans.

27. The 62 land mortgage debts have lasted for

Duration of land mortgages.

and not ascertainable	„	7 „

The borrower generally incurs land mortgage debt when he does not expect to be able to clear off principal and interest within 3 or 4 years. The longer a land-mortgage debt lasts, the longer does it incline to continue as such (under the sowcari system) on account of accumulation of interest, additional borrowing, etc. In the analysis above 25 debts are due to accumulation. Few borrow for ordinary household expenses on land security, but more do so to meet marriage expenses. Details cannot be ascertained of seven mortgages on account of the concerned mortgagors and mortgagees living away from the land : the raiyat living on or by his land consents to a mortgage only when he has no other go except this or a sale.

30. Of 982 families resident in the 12 villages, 395 owe debts based on security other than agricultural land. British Indian money is predominantly current throughout the

Accumulated and
current debts.

District. Hyderabad currency is no doubt accepted when offered, but accounting is done mostly in British Indian money. Of course, land revenue payment is made in O.S. rupees as also loans from Co-operative Banks. B.G. Rs. 98,024-5-5 is the total non-land mortgage debt of

395 families. The average debt per indebted family (excluding land mortgage debt) is B.G. Rs. 248-2-7, and the average debt per resident family (including land mortgage debt) is B.G. Rs. 128-11-4. Practically all villages in Aurangabad grow some *kharif* and some *rabi* crops, and as the inquiry in the District was held between January and the middle of April, the debts as recorded represent neither the indebtedness at the end of a cultivation season before any payments are made to sowcars, nor the indebtedness after harvesting and threshing and annual payments to sowcars. Even so late as the first week of April many raiyats keep their wheat and jawari unthreshed. Therefore, generally speaking (except at Nirkhed and at Daregaon), the debt figures of the 12 villages noted below consist of long-standing debt and part of the year's debt: some raiyats made payments to sowcars between October and January from the *kharif* crops.

TABLE XI.

Name of Village	Total non-land mortgage debt		No. of indebted families	Average debt per indebted family		Average debt per resident family	
	B.G.Rs.	A. P.		B.G.Rs.	A. P.	B.G.Rs.	A.P.

District Average				248	2 7	128	11 4

Even at Nirkhed and at Daregaon in which the debtors have made their annual payments to sowcars, the average debt per indebted family stands at B.G. Rs. 174-10-5 and B.G. Rs. 331-7-6 while in Boregaon Khurd and Khadkheda it is B.G. Rs. 408-7-8 and B.G. Rs. 486-10-8. The net debt running on from year to year is heavy, and any attempt at relief would have to first provide for settlement of this debt by part disallowance in some cases and spreading out into reasonable instalments in other cases.

31 The debts have lasted for—

Old borrowings and
new.

50 years	in	1 case
25 „	„	7 cases

1 year	„	181 „

and less than a year in 89 „

One is hereditary debt, and 19 are sundry—incurred in small amounts at different times from several people. Borrowings of more than 5 years ago are comparatively few in number while slightly less than half was borrowed this side of 3 years.

32. Debts of the 395 families consist of 595 borrowings. Three hundred and eighty three of these are based on personal security, 189 on

Security.

crop security and 23 on other security like house, gold, etc.

The 595 borrowings are recorded

386 on stamped paper, and

116 on plain paper.

Eighty-nine are on oral agreements and 4 are confirmed by decrees of courts of law. No document in these 595 borrowings is registered. There is a general impression that the use of a postal one anna stamp solemnizes every debt transaction, but a good many do not use even this. Few of the sowcars go to courts of law for decrees against their debtors: the bulk of the raiyats are thrifty and punctual in payments, and where there is default the sowcar finds it more convenient to have a renewed bigger bond than a court decree.

33. The 395 debts (taking each family's debt as one unit) are—

Sizes of non-land
mortgage debts.

B.G. Rs. 1,000 and more	in	23 cases
500 „	„	24 „
250 „	„	71 „
100 „	„	120 „
and less than B.G. Rs. 100	„	157 „

34. Details of the rates of interest levied in the 595 borrowings are—

Interest rates.		for the cultivation season		per annum
100 per cent.	1	1
75	3	1
50	20	29
27 $\frac{1}{2}$	5	..
25	118	15
24	94	146

9	3
6	1	..
no interest	50	..
sundry	7	..
instalment loans	16	..
				<hr/>
				277
				245

Two hundred and seventy-seven borrowings are being charged interest rates by the season and not by the month or the year. These seasonal borrowings generally last between 2 and 5 months, and therefore the rates per annum work respectively at more than double the rates in that column. Twenty-five per cent. for the season and 24 per cent. per annum are the rates of interest widely prevalent.

35. Accounts were seen and settled

Settlement of
accounts.

4	..	10
3	..	25
2	..	33
1 year ago	..	351
and less than a year ago	in	161

Borrowings of years ago with no renewals of documents and no payments are no doubt not cognizable in the eye of law, but the borrowings recorded in this inquiry are accepted responsibility for by every concerned borrower. So, every one of these is a *de facto* debt. In 351 cases the debtors made payments to sowcars after the *rabi* harvest of 1338 F., and in 161 cases after the last *kharif* harvest. The raiyats are on the whole well meaning and anxious to be punctual in their payments.

36. The money-lenders are—

Sowcars.

Marwadi sowcars	in	112	borrowings
Mahratta ,,	..	111	..
Arab Mohamedan sowcars	..	35	..
Cutchi ,, ,,	..	2	..

Kannady ,,	..	8	..
Marwadi grocers	..	4	..
and others	..	46	..

About a third of the lenders are Mahratta raiyats, five-eighths are professional sowcars.

37. Of B.G. Rs. 98,024-5-5 total non-land mortgage debt, B.G. Rs. 42,274 (43·13 per cent.) is productive debt; that is, this amount was borrowed for meeting running expenses in productive concerns.

38. Causes for the 595 borrowings are

Causes for other debts.

household expenses	in	187	borrowings
marriage ,,	..	95	..
accumulation	..	39	..
cultivation expenses	..	182	..
non-agricultural business	..	35	..
tenancy dues	..	15	..
and miscellaneous	..	42	..

The *Kharif* crop was poor this year in the southern taluqas and this accounts for the large number of debts incurred for household expenditure. As cultivators the Aurang-

abad raiyats are of a much higher order than Warangal raiyats, better than even Nanded raiyats (it is to be remembered that the bulk of Warangal raiyats are tenant cultivators and the bulk of Aurangabad and Nanded raiyats are proprietary cultivators). Debts on account of tenancy dues are negligible here but prominent in Warangal.

39. Raiyats receive no help from the Agricultural Department with regard to seed supply.

How many preserve seed and how many borrow depends upon the crop and the debt. If the crop is good and the debt is light, the raiyats invariably preserve seed. If the debt is heavy or the crop bad they borrow seed the next sowing season. "Sal Savai" (25 per cent. for the cultivation season really) is the general rate of interest levied on seed loans.

How produce is disposed of

40. Jawari, bajra and kapas are the main crops of the district. Sugar-cane cultivation, in flourishing condition about a decade ago, is now decreasing. Good wheat is harvested in the western taluqas. Mango in the north and orange in the south are the chief fruit crops.

41. Aurangabad is the best District in the State in P. W. D. road mileage, and this is largely responsible for the generally homogeneous condition over the whole District. Improvements are being made here and there, for example between Ambad and Jalna, but maintenance is not satisfactory at numerous places. Several "Katcha" (temporary) roads have become obliterated on account of neglect, for example between Jalna and Bhokardan and between Gangapur and Ambad. The "Pukka" (permanent) roads are wanting in bridges, earth-work and culverts in a number of places. Yet, motor buses manage to run along all these roads. An individual enterpriser has been given certain monopoly rights for running bus services along the roads in the District, but neither the monopoly terms nor the Government control of the concern is efficient. The rates charged are high and several of the vehicles used are below the standard necessary for a public utility concern.

42. The kapas markets are Aurangabad, Jalna, Fardapur, Lasur and Rotegaon. Aurangabad City is the one big market for other produce. There is no difficulty felt with regard to

receiving remittances from outside the State, because

1. the current money in the whole of the District is B.G., and
2. there is a branch of the Imperial Bank at Jalna.

General

43. The standard of life among the raiyats is simple and healthy. The staple grains are Food supply and health. jawari and bajra : in the west a good number use wheat also. In the southern taluqas, between famine and money-lenders, the raiyats are rather under-fed. Milk supply is good in the north-eastern villages and poor in the south and west. The general health of the villagers is quite good, except for some malaria in the Kan-nar taluqa. The Mahratta raiyat spends little on drink and marriage expenses.

44. In many villages by which small brooks run in the rainy season, the people dig pits in Drinking water. the beds of the brooks from which they get their drinking water in summer. Otherwise, the vil-lagers depend upon wells which are generally in good con-dition. At Boregaon Khurd and Daregaon drinking water is not satisfactory. At Siri Saigaon and Khadkheda they have indigenous co-operative management of the single drinking water well in each of them.

45. One hundred and thirty-two are literate in Marathi, 2 in Arabic and one in English. Literacy. No one knows Urdu reading or writing.

46. There are 27 professional litigants. There is no Settlement of dis- panchayat organization but few care to putes. go to courts. A good number of disputes are settled by the sowcars of the disputants, the stronger of the disputants gets his way in others.

47. Considering the terms of the present land mort- gages, the extent of land that has been Land transfers transferred on account of debt transac- tions, the eagerness of the raiyats to do their best both as tenants and as occupants, it may be said that there is good room for a set of land mortgage banks in the Aurangabad District. But the effective means for prevent- ing land transfers from the actual tillers, appears to be the prohibition of alienation of land by cultivating classes.

Prospect

48. Roads are plenty, and the poor maintenance can be materially improved by
Communications.

1. entrusting monopolistic rights for running motor service throughout the District, to a joint-stock concern with adequate capital and enterprise ; and
2. making this same body responsible for the repair and maintenance of all the roads at stipulated rates.

Improvement of the present “ katcha ” (temporary) roads to the condition of permanent roads, would considerably add to means of communication facilities to villagers. It would not be good economy to give up *katcha* roads on which large sums of money have been spent.

49. Aurangabad and Jalna fully deserve to be made organized markets. Necessary arrangements will probably be made under the Marketing of Agricultural Produce Act.
Markets.

50. Between land-grabbing and rack-renting, the raiyats of Aurangabad are now passing through an era of general decline although soil is fertile and climate congenial.
Conclusion.

SARNAPUR.

(*Aurangabad Taluqa*).

This is a village in the vicinity of the Daulatabad Fort, about two miles from the Daulatabad Railway Station. There are 46 resident families with a population of 253. The soil is poor.

Landholdings.

2. The area of the village is apportioned thus :—

	acres
gairan (survey Nos. 1 and 2)	33-18
not suitable for cultivation (survey No. 8) ..	241-11
dry land	1,694-34
garden land	1-10
“ phoot kharab ”—land unsuitable for cultivation within assessed survey numbers ..	56- 6
“ gavtan ”—site of the village	6-32
area not available for cultivation (cart-tracks, rivers, channels, etc.)	60-32
Total area of the village	2,094-23

3. Revision settlement was applied to this village in 1328 F. There are 10 agricultural wells of which one is used for drinking water only, and one for agricultural purposes. Eight other wells are in disuse. Kapas, bajri and a little of horsegram are the kharif crops and jawari is the only rabi crop. Sugar-cane was grown before 10 years but discontinued since. The enthusiasm for good cultivation is low, though the people are very particular about maintaining occupancy rights. Except for acre 1-10, the entire cultivated land is sown with dry crops for over a decade. The price of agricultural land is between B.G. Rs. 6 and B.G. Rs. 12 per acre.

4 There are 21 pattas, in 4 of which neither the patta-dars nor their heirs hold any portion of the land shown against the respective pattas. The number of actual occupants is 38, one of them holding the real acre 1-10 of garden along with dry land. Of these 38, 7 occupants have joint families, 31 have partitioned. The size of the average dry landholding is

acres $\frac{1694-34}{38}$ dry land = acres 44-24 nearly.

Acres 36-14 would be the area per family, if the agricultural land were equally distributed among all resident families.

5 Classification of occupants according to size :—

				dry	garden
occupants holding	400	acres and more	..	1	0
Do	200	do	..	1	0
Do	100	do	..	1	0

Do	22	.. 1	0
Do	20	.. 2	0
Do	18	.. 0	0
Do	15	.. 2	0
Do	12	.. 1	0
Do	10	.. 0	0
Do	8	.. 0	0
Do	5	.. 1	0
Do	2	.. 5	0
Do	less than 2 acres	.. 2	1
Total number of cultivating occupants		.. 30	1

7. The one part-cultivating occupant holds acres 46-28. Of these 31, two are by subsidiary profession butter sellers, and one is the mali and police patel of the village. The remaining 28 depend entirely on agriculture. Of the 7 non-cultivating holders, 5 are *mahars*, one a butter seller at Bombay and the other is the patwari of Gadona, a village about 20 miles away.

8. The accompanying Land Transfer Statements show that the bulk of the transfer has been from cultivating to cultivating classes only. The explanation appears to lie, not in Sarnapur being protected from the general feature in the Aurangabad District by its nearness to the District head-quarter, but in the soil being rather poorly off.

72	..	10-36
65	..	26- 7
67	..	32- 7
68	..	25-38
Total ..		229- 4

Agricultural Tenancies.

10. There are 18 tenancies, four of the tenants being landless. The total area let out on tenancy terms is acres 677-22 working at 39·9 per cent. nearly of the total agricultural area. The four landless tenants hold on tenancy terms acres 82-14, acres 595-8 being held by landowning tenants.

11. The tenancy agreements are in 17 cases annual and oral. There is one case of 5 years contract written on plain paper. Tenancy dues are paid punctually by the tenants, in 9 cases in money, in 9 cases in kind. Where the contract is on money terms, the occupant gives no help. But where the contract is for half crop, the occupant (when he is a non-cultivator) generally gives the manure accumulated in his house, and half of the seed required (to be deducted out of the gross produce). In these 18 tenancies, the tenants have been on the respective lands for the following number of years :—

in 3 tenancies for	1 year each	
„ 2	„	3 „
„ 2	„	5 „
„ 1 tenancy for	6	„
„ 1	„	8 „
„ 2 tenancies for	12	„
and 7	„ over 40	„

Yet, 17 of the 18 tenancies are annual contracts.

Agricultural Labourers.

12. Of the 46 resident families, only two are landless and tenancyless (one is a barber's family, the other a domestic servant's). This village has no blacksmith, no carpenter and no washerman. The raiyats depend on the artisans in the neighbouring villages.

13. The wage per day for male adults, is between 5 and 6 annas, for women between 3 and 4 annas. The annual pay for an agricultural "nowker" is between B.G. Rs. 90 and Rs. 100 without food.

Land Mortgage Debt.

14. There is only one land mortgage, the extent of the mortgaged area being acres 26-33 dry land. The estimated value of the land is B.G. Rs. 125, the actual mortgage debt being B.G. Rs. 50. This is a mortgage with possession for 10 years, given five years ago. The money-lender is a Parsi mill-employee and the debt was incurred to meet household expenditure. The mortgage document is registered.

Other Debt.

15. Of the 46 resident families, one has only land mortgage debt, 22 have non-land mortgage debts, and 23 are debt-free. Most of the debtors have yet to make their annual payments to their sowcars, and the amount outstanding shows the debt at the end of an agricultural season. B.G. Rs. 1,303-8-0 and $10\frac{1}{2}$ pallas of jawari is the total debt, the total at money terms being B.G. Rs. 1,408-8-0. This gives an average of B.G. Rs. 64 debt per indebted family. Distributed among all the 46 families, the debt works at B.G. Rs. 30-10-0 per family. At the time of investigation the rabi jawari crop is cut but not yet threshed. Details given in the Table on Other Debts show that there is very little of debt (namely, B.G. Rs. 370) standing for over a year. The ultimate explanation for this seems to lie in the poverty of the soil.

16. All the 22 families have borrowed on personal security, repayment being left to their convenience, either out of the kharif or out of the rabi crop. As a rule the repayments are made after threshing the rabi jawari crop.

17. The jawari loans are all oral. Money loans are in B.G. currency, and thumb impressions are taken in the *kathapattis* (account books) of the sowcars (with one anna stamp

in case the amount exceeds Rs. 20). In the case of approved customers, the sowcars in this area do not use the one anna stamp whatever the size of the amount might be.

18. According to size, the 22 indebted families' dues are classified thus :—

		No. of families	
debts of Rs. 1,000 & over			0
Do	500	do ..	0
Do	250	do ..	2
Do	100	do ..	3
less than 100		..	17

19. In 8 cases, interest is charged in kind and the rate in all these cases is 50 per cent. per agricultural season. In 7 cases, money interest is levied : 50 per cent. in one case, 24 per cent. in 5 cases, and 25 per cent. in one case. No interest is levied in 15 cases (sundry, purchase of clothes and tenancy dues).

20. The debts have lasted

for 6 years in one case

4 do

3 do

1 year and less in 16 cases.

Three of the debts are sundry.

21. In all the 22 cases, accounts were settled about a year ago. In cases in which accounts have not been settled even once after the original borrowings (on account of these being recent or for some other cause), the dates of the latter are considered as the respective dates of settling accounts.

22. Money-lenders are—

marwadi sowcars ..	in 15 cases
mahratta cattle dealers ..	„ 3 „
a Parsi mill-employee ..	„ 1 case
and an Aurangabad Sikh grocer	1 „

Two debts are in very small amounts from several people in each case.

23. Main causes for the debts are—

clothing	in 8 cases
household expenses	„ 6 „
marriage expenses	„ 1 case
purchase of bulls	„ 2 cases
purchase of cotton seed	„ 1 case

purchase of cart	in	1 case
prior debt	„	1 „
tenancy dues	„	1 „
and housebuilding	„	1 „

B.G. Rs. 604 of the debt is productive.

Seed Supply.

24. About a half of the raiyats borrow seed, the other half preserve out of the previous harvest. 25 per cent. more is paid at the next harvest season, than the seed borrowed.

How Produce is disposed of.

25. The little kapas that is grown is sold at Aurangabad. All transactions are by weight, of the same proportion and denomination as the one prevalent at Hyderabad City. 80 tolas (British Indian rupee weight)=1 seer, 40 seers=1 maund, 3 maunds=1 palla.

General.

26. Milk supply is fairly good : the good bit of fallow land is used for grazing purposes. The raiyats eat more of bajri than jawari. For about 4 months in the year they drink the water of a small brooklet running by. During the remaining months one of the agricultural wells is resorted to for drinking water. Health is quite good, children are plumpy and cheerful. There is no ill-health of an infectious or epidemic nature.

27. There is no school. Three persons are literate in Mahrathi, none in Urdu or English. There is no bicycle nor sewing machine. Many of the raiyats have two wives. Very few resort to drink, and even these once in a way. Statistics from village records are not available, regarding cows, bulls, ploughs, etc.

28. Sarnapur raiyats are hard-working and thrifty. They have no troubles on account of oppressive loans, the village officers have no hand in money-lending or land transfers but the soil is poor and they have not got enough facility for capital to make the best of the soil. They know well that if they use good manure, if they use water from their wells, they can grow richer crops, but they have not the capital necessary. They rightly think that to borrow on sowcar terms at present rates will not pay.

BUN KINOLA.

(Aurangabad Taluqa.)

This village is about forty miles from the Aurangabad Railway Station, along the Ajanta Road. At the time of investigation, the resident families number 97 and the population 501.

Landholdings.

2. The area of the village is distributed as follows :—

	acres
dry land	1,164-23
garden land	131-18
phoot kharab and gairan	39-17
village roads, etc.	5- 6
" gavtan "	3-37
rivulets, channels, etc.	14-29

Total area acres .. 1,359-10

3. Revision settlement was applied to this village in 1328 F. Competition for landholding is keen and the cattle are comparatively small in number on account of insufficient grazing ground (survey nos. 10 and 31, acres 26-25). There is no fallow land. Practically all the area classed as garden is used for garden crops once in 2 or 3 years, and so the whole area is taken as garden land for the purposes of this investigation. Price of dry land is between B.G. Rs. 30 and Rs. 50 per acre, that of garden land between B.G. Rs. 80 and Rs. 100.

4. There are 43 pattadars. In 7 pattas, neither the concerned pattadars nor any of their heirs hold any portion of the lands shown against their respective names. The actual number of occupants is 78. Garden land is held by 40 of these. The occupants are classified as below :—

			dry garden	
occupants holding	100 acres & more	..	0	0
Do	75	do ..	0	0
Do	50	do ..	4	0
Do	40	do ..	4	0
Do	35	do ..	1	0
Do	30	do ..	2	0
Do	28	do ..	1	0
Do	25	do ..	1	0
Do	22	do ..	5	0

				dry	garden
occupants holding	20	acres & more	..	4	1
Do	18	do	..	5	0
Do	15	do	..	4	0
Do	12	do	..	6	1
Do	10	do	..	4	1
Do	8	do	..	1	1
Do	5	do	..	5	2
Do	2	do	..	4	15
Do	less than 2 acres		..	27	19
Total				78	40

The size of the average dry land holding works at acres 14-37 of garden at acres 3-11. Distributed equally among the resident families, each family would get acres 12-0 of dry land and acre 1-14 of garden land.

5. Ten of the occupants have each a joint family. Sixty-eight have partitioned into their present holdings.

6. Of the 78, 65 are cultivating owners, 2 cultivate portions of their respective lands, and 11 are non-cultivators. The cultivating landholders are classified thus :

				dry	garden
cultivating					
occupants holding	100	acres & more ...		0	0
Do	75	do ...		0	0
Do	50	do ..		4	0

Do	less than 2 acres..			23	11
				<hr/>	<hr/>
				67	81

Sixty of the cultivating occupants depend entirely on cultivation ; 6 have subsidiary occupation. One pursues agriculture as a subsidiary profession. Two are mullas, one a mali-patel, one a police-patel, one a weaver and one a sowcar. Of the 11 non-cultivating occupants, 7 are engaged thus :—

mullas	..2
joshis	..4
sowcar	..1

Two are women and 2 do nothing.

7. The accompanying Land Transfer Statements show that while the transfers are numerous, the major portion of transferred land is from cultivating classes to cultivating occupants—some of them belonging to cultivating classes, some to non-cultivating classes.

Total ..		212- 8		28- 4				

Agricultural Tenancies.

8. There are 11 tenancies held by 13 tenants, 3 of them being landless tenants. The total area held on tenancy terms is acres 114-30 dry land and acres 19-10 garden land, constituting respectively 9·8 and 14·6 per cent. of the total dry and garden areas. This smallness of the area let out on tenancy terms is to be accounted for by the fact that Bun Kinola consists predominantly of small cultivating landholders.

9. One tenancy is contracted for 6 years, one for 3 years and 9 for one year each. The tenants have been on crop and the concerned lands

	in 3 cases for 2 years each.			
	„ 3	„	3	„
	„ 1	„	5	„
	„ 3	„	6	„
and	„ 1	„	16	„

10. In 3 cases, tenancy dues are paid in kind, in 2 cases in money, and in 6 cases in both (that is, half of half of the land revenue dues). There is one case of sub-tenancy.

11. About a half of the tenancies are oral agreements, the other half being on plain paper. In the *batai* system, land the occupant and tenant generally share manure, seed and revenue charges equally.

Agricultural Labourers.

12. Of the 97 resident families, 30 have neither agricultural occupancies nor tenancies. This is apart from the 20 mahar families which have each a negligible share in the inam land for mahars. This comparatively large number of landless tenancyless families is due to the thickness of population compared to the area of agricultural land available in the village. Details of the 30 families are :—

cobblers	5
Woman dependent	1
carpenter	1
confectioner	1
kalals (toddy sellers)	3
oil-monger	1
washermen	2
day labourers	8
tailor	1

goldsmith	1
blacksmith	1
mulla..	1
fakirs..	3
agricultural labourer engaged			
by the year	1

B.G. Rs. 60 to 70 is paid for agricultural “nowkers” with food, clothing and shoes. Five annas a day and $2\frac{1}{2}$ annas a day (B.G.) is the average wage per day for male and female adult workers. When engaged on harvesting work, both men and women are paid at 4 seers of jawari per day.

Land Mortgage Debt.

13. There are 7 cases of land mortgage, the extent of land mortgaged being acres 75-21 dry land 8-3 garden land. The estimated value of this land is B.G. Rs. 6,550 and the debt is B.G. Rs. 2,155.

14. Three are mortgages with possession accruing to conditional sale if not redeemed within five years. Two are simple mortgages without possession and without any time limitation. Two others are simple mortgages with conditional sale clause attached, in one case the time limit being 2 years, in the other case 5 years.

15. The rate of interest in each of the four simple mortgage cases is 24 per cent.

16. The money-lenders are :—

Hindustani Mahomedan sowcar in two cases

Arab Do „ three „

Rohilla Do „ one „

and Mahratta sowcar „ one „

17. Main causes for the debt are

marriage in one case

household expenses „.. two cases

accumulation „.. do

and cultivation expenses „ do

18. The debts have lasted :—

one year in .. 1 case

2 years „ .. 3 cases

3 years „ .. 2 „

and 10 years „ .. 1 case

19. In the four simple mortgage cases, accounts were settled last respectively one year, 10 months, 9 months and 3 months before.

Other Debts.

20. Of the 97 resident families, 47 are debt-free. One family has only mortgage debt while four have both land mortgage and non-mortgage debt. Forty-nine families have debts based on security other than agricultural land. About half the number of landless and tenancyless families are indebted. The total amount of debt (other than on land security) is B.G. Rs. 11,189-2-0, 4 pallas and $2\frac{1}{2}$ maund of bajri and $4\frac{1}{2}$ pallas of jawari. Giving a money value to these commodity debts at local current rates, the gross debt of the village amounts to B.G. Rs. 11,303-2-0. The size of average debt per indebted family works at B.G. Rs. 230-10-10 nearly. If the total amount of debt of the village is divided among all the resident families of the village, the size of debt per family works at B.G. Rs. 116-8-5 nearly. The bulk of annual repayments to sowcars are usually made at "nag dewali," but this year very few seem to have paid towards interest and principal: the village is said to have had a poor jawari crop. Therefore, B.G. Rs. 11,303-2-0 represents the sum total of arrears of debt of previous years and sums borrowed during the current year. An attempt was made to separate the prior debt from the debt incurred during the year, but satisfactory information could not be got as the raiyats could not remember (in some cases did not know) the amounts for which they had put in their thumb impressions nearly a year ago.

21. The forty-nine debts consisting of 74 borrowings are secured thus:—

personal security	..	60
crop security	..	13
personal & crop security	..	1
		<hr/> 74

22. Generally the borrowings of the village are recorded on stamped paper. In very few cases oral agreements are considered to be sufficient warranty for the repayment of loan.

23. According to amounts the 49 debts are classified thus—

debts of B.G. Rs. 1,000 and more	..	3
Do 500 do	..	2
Do 250 do	..	4
Do 100 do	..	19
Do less than B.G. Rs. 100	..	21

24. The 74 borrowings classified according to the rates of interest stand as follows :—

50 per cent. in	.. 10 cases
49.8 ,,	.. 1 case
25 ,,	.. 1 ,,
24 ,,	.. 49 cases
18 ,,	.. 8 ,,
15 ,,	.. 1 case
Nil ,,	.. 2 cases
*not ascertainable in	.. 2 ,,

74

*In one of these two cases a sewing machine is purchased on hire purchase system by a professional tailor ; in the other mango trees are mortgaged and the fruit is enjoyed by the creditor.

25. According to duration the 74 borrowings are classified as under :—

debts that have lasted for	20 years	.. 1
Do	16 ,,	.. 2
Do	15 ,,	.. 3
Do	10 ,,	.. 5
Do	8 ,,	.. 2
Do	7 ,,	.. 2
Do	6 ,,	.. 5
Do	5 ,,	.. 2
Do	4 ,,	.. 1
Do	3 ,,	.. 20
Do	2 ,,	.. 12
Do	1 year	.. 13
Do	6 months	.. 1
Do	2 months	.. 4
not ascertainable 1

74

26. In 61 of the 74 cases, accounts were seen and settled about a year ago, while this was done in 5 cases 3 years ago, in one case 2 years ago, in one case 8 months ago, in one case 6 months ago and in 5 cases 2 months ago. In cases in which accounts have not been settled even once after the original borrowings (on account of these being recent or for some other cause), the dates of the

latter are considered as the respective dates of settling accounts.

27. The money-lenders in the 74 cases are
- | | |
|-----------------------------|--------------|
| Deccani Mohamedan sowcar in | .26 cases |
| Brahman sowcars | „ 5 cases |
| Brahman village officer | „ .. 1 case |
| Arab sowcar | „ ..25 cases |
| Marwadi sowcar | „ .. 3 cases |
| Mahratha raiyats | „ ..12 cases |
| Mohamedan raiyat | „ .. 1 case |
| Singer Sewing Machine Co. | „ .. 1 case. |

The debts due to the two big sowcars, one Arab Mohamedan living in the village (holding dry land acres 49-8 and garden land acres 5-23) and the other a Deccani Mohamedan residing outside the village (holding acres 18-10- dry land and acre 1-12 garden land), are respectively B.G. Rs. 4,027 and B.G. Rs. 4,159.

28. Main causes for the 74 borrowings are as follows :---

marriage	.. 3 borrowings
household expenses	..19
cultivation expenses	..10
prior debt	.. 5
purchase of bulls	..13
Do buffalo	.. 1 borrowing
Do land	.. 2 borrowings
well-sinking	.. 3 ..
business	.. 7
house-building	.. 2
purchase of clothes	.. 2
litigation 1 borrowing
payment of land revenue	1 ..
repair of well	.. 1 ..
purchase of sewing machine 1
expenses on patta	..
transfers 1
tenancy dues	.. 1 case
sundry 1 case

29. Out of the total of B.G. Rs. 11,303-2-0 about B.G. Rs. 8,691 is productive,

Seed Supply.

30. The majority borrow seed. Fifty per cent. more in kind is paid back at the time of the next harvest.

How produce is disposed of.

31. The main crops are all kharif—jawari, bajri and kapas. Sugar-cane is grown in garden lands in these areas, once in 2-3 years. But of late there is a general decline in sugar-cane cultivation on account of working expenses being high and the price of jaggery being low.

32. The little produce that goes out for sale goes to Aurangabad. There is a road to Aurangabad, but it is not protected properly at many places against steep sides and on-rushing 'buses, and the raiyats find it very hard to manage without sufficient water-supply on the way for their bulls and their cooking.

General.

33. The staple food is bajri, and the people are quite simple and healthy. There are 14 wells used for drinking water. In these areas water is available fairly high up in wells, and it does not fail in summer time. Milk supply is quite plentiful.

34. Statistics from village records (1339 F.) are :

bulls	185
cows	112
buffaloes	71
sheep	167
ploughs (four-bulls)	34
agricultural wells	14
carts	4

35. Twenty-two persons are literate in Mahrathi. No one knows Urdu or English. Two are literate in Arabic. Four persons are professional litigants. There is one sewing machine. There is no cycle.

36. Bun Kinola ("Orange Garden") is indeed an appropriate name for this village. It is an extremely pleasing and encouraging situation, early in the morning, to see the youth of the village hard ploughing and to hear them so musically and kindly cajolling their bulls on the fields. But the weight of interest charges is heavy and takes away a good bulk of what ought to further improve the health and crops of Bun Kinola.

KHUPTA.

(Bhokardan Taluqa.)

To the north of Bhokardan Taluqa, this village is about 6 miles from Khandesh frontier. The number of resident families at the time of investigation is 151 and the population 754.

Landholdings.

2. The total area of the village is 2,080-34 acres of which 93-33 acres is not available for agricultural purposes. Out of the remainder, 1869-12 acres is occupied dry land, and 117-29 acres occupied garden land. There is no unoccupied cultivable land nor fallow. Of the 104 survey number, two numbers are *gairan* (grazing ground). Acres 44-5 the village common, and acres 6-30 constitutes the village site.

3. There are 62 pattadars' khathas, four joint pattas, and 65 pattadars. The actual number of occupants according to the inquiry is 87, of whom two hold small pieces of garden land only, and 85 hold dry land. Of these 85, 26 hold garden bits in addition.

4. Revision settlement was applied to this village in 1329 F. and several acres classed as wet before, were then reclassified as dry area. Competition for land is very keen, fertility of a fair standard. The main crops are jawari and kapas (kharif), and wheat and Bengal gram (rabi). Sugar-cane is largely grown in the area classed as "garden" land: water in agricultural wells (21 in number) is adequate in supply and does not fail in summer. The price of an average acre of dry land is between B.G. Rs. 70 and Rs. 90, that of garden land between B.G. Rs. 140 and Rs. 180.

5. The occupants classified according to sizes of their holdings stand thus :—

				Dry	Garden
occupants holding	100	acres and more		4	0
Do	75	do	..	2	0
Do	50	do	..	4	0
Do	40	do	..	2	0
Do	35	do	..	1	0
Do	30	do	..	2	0
Do	28	do	..	1	0
Do	25	do	..	2	0
Do	22	do	..	2	0

				Dry	Garden
occupants	holding	20 acres and more		1	0
Do	18	do	..	2	0
Do	15	do	..	11	1
Do	12	do	..	5	1
Do	10	do	..	9	0
Do	8	do	..	5	2
Do	5	do	..	12	5
Do	2	do	..	5	13
	less than 2 acres		..	15	7
				85	29

The 29 garden holdings are held, 2 by themselves and 27 along with dry land.

6. Cultivating occupants number 46. Two of them are cultivating owners of garden land only, and 19 of the remaining 41 cultivate both dry and garden land. They are classified thus :

			Dry	Garden
cultivating occupants	holding	100 acres and more	1	0
		plus	1 partly	
Do	75		1	0
Do	50		4	0
Do	40		2	0
Do	45		1	0
Do	30		1	0
Do	28		1	0
Do	25		1	0
Do	22		2	0
Do	20		1	0
Do	18		1	0
Do	15		6	0
Do	12		2	1
Do	10		8	0
Do	8		2	2
Do	5		6+	4+
		1 partly		1 partly
Do	2		2	5 +
				1 partly
Do	less than 2 acres		0	7
			42+	19+
			2 partly	2 partly

7. Of the 3 landholders occupying more than 100 acres each, one cultivates part of his land. This man's main profession is money-lending. Two other sowcars and one grocer pursue agriculture as a subsidiary occupation. Of the 41 other cultivating occupants, only one has a subsidiary occupation (he is the *mali patel* of the village) and 40 are entirely dependent on agriculture.

8. Forty-one do not cultivate their holdings. Nine are sowcars, 1 sowcar and grocer, 2 cloth merchants and one moazin (mosque attendant). The other 28 are mere rent receivers, four of them being women.

The size of the average holding works at
acres $\frac{1869-12}{85}$ dry land = acres 22-0 nearly,

and acres $\frac{117-29}{28}$ garden land = acres 4-8 nearly.

Divided among the resident families equally, each would
get acres $\frac{1869-12}{151}$ dry land = acres 12-15 nearly of dry land

and acres $\frac{117-29}{151}$ garden land = guntas 31 nearly of garden land.

9. During the last 25 years, acres 663-20 of dry land and acres 27-20 of garden land have passed hands as shown in the accompanying Tables. In the majority of cases, the transaction invariably began with the raiyat borrowing money from the sowcar. A few years after, in spite of payments made annually by the borrower, the sowcar would get renewed thumb impressions for larger and larger amounts, and finally threaten to drag the fearing raiyat to court. The "compromise" to which the borrowing, *believing* raiyat would readily agree was to execute a "bynama" *selling in all legal solemnity* all his lands to the sowcar, which *bynama* was invariably registered. In every one of these cases, the lender solemnly assured the borrower that the sale deed was only nominal—just to persuade the borrower to clear off his debt as quickly as possible—and that the land would be released *at any time* the borrower repaid the amount. For this assurance the seller was not given any written promise: it was "thondi" or oral promise. But, said the money-lender, he would not expel the raiyat from his lands: he could remain there as long as he liked, provided year after year he paid to the sowcar amounts of money due to the latter on account of, the loan as the raiyat thought, the land as the sowcar

really meant. Each of these raiyats, originally holders now reduced to tenants on their own original holdings, executed in favour of the sowcar a *kabuliath* undertaking to cultivate the concerned land as tenant, this *kabuliath* being renewed every year. The amount paid every year by the deceived raiyat is considered by him as interest on the loan due from him to the sowcar, but the sowcar takes it as tenancy due based on the annual tenancy agreement. Some years pass like this, and after this, the sowcar quietly goes (as he has gone in a number of cases at Khupta) to the court of law, produces the document, gets a decree authorising him to get possession, and suddenly faces the concerned cultivator with the threat of immediate expulsion unless he agrees to give up all talk of occupancy rights and continues strictly as a tenant. The raiyat has absolutely no other go, and the last stage (which has begun in some cases) is for the new non-cultivating occupant to increase his rent once in 2 or 3 years.

10. Three of the big landholders (two non-cultivating and one cultivating) whose possessions are due to accumulations of this sort, were asked to explain what they meant by this surreptitious process, why they allowed the raiyats to continue to believe that they had occupancy rights even after execution of sale-deeds. Two said that it was a process of self-deception on the part of the raiyats for which they (the sowcars) were not responsible : the third said that he was ready to return the lands if all the principal and interest due was repaid, but not one of the concerned raiyats could pay.

The real explanation for this long spread-out process of dispossession lies in

- (1) the readiness of the illiterate raiyats to believe in the honesty of every man, and thus to attach thumb impressions to every kind of document without ascertaining the terms thereof : many of the sale-deeds are for impossible prices neither earnt nor paid but accumulated in account books,
- (2) the anxiety of the land-grabbing sowcars to maintain the high price of the land ill-gotten by themselves, by having the land well cultivated : that man would do it best who was the cultivating occupant before : the new occupants are as a rule non-cultivators, mere rent receivers ; and

- (3) their concern to avoid anything like public obloquy annoy the villagers : expulsion of one of their fellows from his land would probably result in the raiyats making common cause against the outsiders.

Only one of the big landholders lives in the village, but his main profession is money-lending.

Agricultural Tenancies.

12. Many of the old peasant proprietors are now mere tenants. All the tenancies are on written and stamped agreement—all for one year each, except one which is for three years. The fifty tenancies comprise acres 761-10 dry land and acres 29-3 garden land, being 40·8 per cent. of total dry land and 24·9 per cent. of total garden land. About a half of the tenancies are on money terms, the other half being on *batai* (half of the crop plus half of the land revenue assessment). Tenancy dues are generally paid punctually.

Agricultural Labourers.

13. Seventy-one of the 151 families have neither occupancies nor tenancies. Fifty-two families earn their livelihood by daily wages, and the details of 19 are :

cobblers	..	4
beggars	2
woman dependent	..	1
carpenters	..	2
arrack seller	..	1
barbers	2
police-patel	..	1
blacksmith	..	1
goldsmith	..	1
police-patel	..	1
cartman	..	1
patwari	1
joshi	1
tailor	1
		<hr/>
		19
		<hr/>

14. Families belonging to depressed classes (*mahars*, *mongs* and *chambars*) number 27. Of these, 13 have very small shares in the yield of the *inam* land held by the mahars, but these shares are only nominal, the inam number being only acres 6-33 dry land in extent. Otherwise, all these 27 families live on occasional daily work and the jawari collections they make (*balutha*) at the harvest season.

15. Wages are mostly paid in money. Women get 3 annas per day and men 6 annas per day. In agricultural season, if crops are good, wages go up to 12 and 6 annas respectively.

Land Mortgage Debt.

16. More than a score of cases are really sales, but the cultivators unheedingly believe them to be a kind of mortgage. Really there are only two mortgages, the extent of land mortgaged being acres 24-11 dry. The estimated value of the land is B.G. Rs. 2,350, the mortgage debt being of B. G. Rs. 900. Both are mortgages with possession, and in both the mortgage deeds have been registered. In one of these cases, the possession of the land is given away for Rs. 100 and the debtor pays interest on Rs. 200 (total mortgage debt being Rs. 300) at 27 per cent.

Of the mortgages, one is a Deccani Mahomedan vakil, one a marwadi sowcar.

One of the debts was incurred on account of heavy agricultural expenses, one to clear off prior debt.

Both the mortgages were entered into four years ago.

Other Debt.

17. All business transactions are in British Indian Currency. Osmania Sicca Currency is acceptable, but all accounting is in B.G. currency and it is once in a way that O.S. currency is paid or received. One reason why O.S. rupees are always accepted is that raiyats have to pay land revenue in O.S. currency. One of the rates of interest prevalent is $16\frac{2}{3}$ per cent : to lend O.S. rupees and to recover the same number of B.G. rupees after 12 months.

18. The two land mortgage debtors live outside Khup-ta, and therefore all the debt of the resident families is on security other than agricultural land. The number of indebted families is 91, 60 being debt-free. The debt-free families mostly belong to the depressed and the wage-earning classes. The total amount of debt (other than on land security) is B.G. Rs. 17,030-5-0, 10 7/12 pallas of jawari, one maund of alasi and 3 seers of karad. Converting these commodity debts to money terms at local current rates, the gross debt amounts to Rs. 17,139-11-5. The size of debt per average indebted family thus works at B.G. Rs. 188-5-7. Divided among all the resident families, the size of debt per family works at B.G. Rs. 113-8-2 nearly.

19. The 91 debts consist of 177 borrowings which are based on the following securities :—

personal security ..	143
personal service ..	2
gold security ..	1
crop security ..	16
personal and crop security	1
sundry	10
<hr/>	
Total ..	173
<hr/>	

20. The four house mortgage debts (as given out by the debtors) are of the same kind as the professed land mortgage debts referred to under Landholdings. The lenders have in all these four cases got registered sale-deeds of the houses, and have got *kabuliaths* from the original owners to live in the respective houses as tenants paying rents. The present tenants claim that what they pay is interest on money due from them to the sowcars, but this is a claim which cannot receive any consideration in a court of law, however much they in fact have been trapped in by unfair means.

21. At the time of inquiry, the little *kapas* that was picked is sold off, yet practically very few have yet settled accounts with and made payments to their sowcars. This means that the indebtedness as gauged is at its height—at the end of a season of agricultural expenses. The general period for settling accounts and making payments (as a rule debtors here pay for interest and principal only in rupees and not in kind) is between “nag diwali” and “holi”, that is between about December 1st and March 15th.

22. The 173 borrowings are based :—

119 on stamped paper (in some cases one anna, in others four annas).

14 on plain paper, and

40 on oral agreements.

23. According to amounts, the 91 debts stand classified thus :—

debt of B.G. Rs. 1,000 and more	2
Do 500 do	7
Do 250 do	16
Do 100 do	28
less than B.G. Rs. 100	38
<hr/>	
	91
<hr/>	

24. The rates of real interest are :—

50 per cent.	for the season in	10 borrowings
37½	do	„ 3 do
25	do	„ 94 do
24	do	„ 30 do
18	do	„ 8 do
16½	do	„ 1 borrowing
12	do	„ 3 borrowings
no interest		20 do

169

and four of the borrowings are instalment loans.

25. They are of the following duration :—

hereditary	..	1
16 years	..	1
15 „	..	2
13 „	..	1
10 „	..	4
8 „	..	5
7 „	..	4
6 „	..	8
5 „	..	9
4 „	..	7
3 „	..	12
2 „	..	21
1 year	..	63
less than a year	..	24
sundry	11

173

26. In 120 cases, accounts were seen and settled about a year ago, while this was done two years ago in 6 cases, 3 years ago in 3 cases, 4 years ago in 3 cases, 6 years ago in 3 cases, and less than a year ago in 38 cases.

27. The money-lenders in the 173 borrowings are :—

marwadi sowcars in	..	46 cases
Mahratta sowcars „	..	70 „
Mahratta raiyats „	..	25 „
brahmin sowcar „	..	24 „
Mahratta women „	..	3 „
cobblers „	..	3 „
barber „	..	1 case.
and sundry „	..	1 „

173

The debts due to the three big landholders of the village 2 marwadis and one mahratta, are respectively.

B.G. Rs. 2,348-0-0

„ 1,975-0-0

„ 4,121-8-0

28. Main causes for the 91 debts are :—

marriages	in	..	36	cases
household expenses	in	..	44	„
cultivation expenses	in	..	23	„
prior debt	in	..	5	„
business (non-agricultural)			7	„
purchase of bulls	in	..	10	„
purchase of seed	in	..	8	„
purchase of land	in	..	7	„
tenancy dues	in	..	10	„
well-sinking	in	..	1	case
miscellaneous	in	..	2	cases
house repair	in	..	1	case
medicine	in	..	1	„
hereditary	in	..	4	cases
litigation	in	..	3	„
land revenue payment	in	..	3	„
purchase of cart	in	..	5	„
purchase of clothes	in	..	1	case
and sundry	in	..	2	cases

173

29. Out of the total of B.G. Rs. 17,139-11-5, about B.G. Rs. 6,518 is productive, the rest being on account of household expenses, marriage celebrations, etc.

Seed Supply.

30. The majority borrow seed, or borrow money at sowing time for purchasing seed. This is on account of the growing poverty of the village as a whole which is becoming more and more a prey to sowcars and vakils.

How produce is disposed of

31. The bulk of the *kapas* goes for sale to Ajanta and Fardapur, a portion to Aurangabad. No food-grain goes out of the village except tenancy dues in kind to landholders living at Shivna.

32. All things are weighed, and the nomenclature is the one current at Hyderabad City, namely, the seer, the maund and the palla. But, two kinds of seers are used. B.G. Rs. 80 weight is used for ghee, B.G. Rs. 84 for jaggery, wheat, etc.

The local four-seer stone weights 4 seers and 20 tolas.

General.

33. Milk supply is good. People eat jawari roties with *tuvar dhal*, and occasionally wheat ones. The general standard of life is simple and healthy. Milk is freely consumed, but ghee is sold. Few drink heavily and beyond their means, and many of the extravagances on smoke, clothing, marriage expenses, etc. noticeable in neighbouring villages of British India, are absent here.

34. There is only one drinking water well which is used by all the villagers, but the water is good and does not fail in summer. General health is quite good, the size of the average family tending to become larger.

35. Statistics from village records (1339) are :—

bulls	294
cows	111
he-buffaloes	30
she-buffaloes	44
goats	62
sheep	206
ploughs	59

36. Fifteen know Mahrathi reading and writing. No one knows Urdu or English. Practically every householder has some time or other gone to Tahsil Office or Court of Law in connection with some dispute or other. There is no panch spirit.

37. Khupta is good in fertility and personnel : almost every family has good workers. But the prospect is rather sad on account of the unbridled malpractices of the sowcars living at Shivna, Adgaon and Bhokardan.

SIPORA JADEED.

(Bhokardan Taluqa.)

This village was *jagir* till recently. The original survey and settlement came into force in 1325 F. Situated to the east of the Taluqa, it is about four miles from the Berar frontier. The resident families number 100 and the population is 461 at the time of the investigation.

Landholdings.

There are 56 *khathas* of landholders, the pattadars number 54. In 10 *khathas* the land is held at present by persons who are in no way related to the pattadars or their heirs. Actual occupants number 82. One holds garden land only, 29 occupy bits of both dry and garden land, and 52 hold dry land only. The village area is distributed thus :

rivers, nullahs, cart-tracks ..	Acres 87-11
gavtan (village site)	8-38
phoot-kharab (unsuitable for cultivation). ..	43-39
total area not available for cultivation	140- 8

There is no land earmarked as grazing ground, nor is there any unoccupied cultivable land. The 165 cultivable survey numbers comprise

dry land	Acres 3,064- 9
garden land	129- 8
total area of the village	3,333-22

The size of the average dry landholding works at
 acres $\frac{3,064-6}{81}$ = acres 37-38 nearly,

and the size of the average garden holding is
 acres $\frac{129-8}{80}$ = acres 4-12 nearly.

3. Classified according to sizes of their holdings, the occupants stand thus :—

				dry garden	
occupants holding	200 acres and more	..		1	0
do	100	do	..	5	0
do	75	do	..	5	0
do	50	do	..	5	0
do	40	do	..	4	0
do	35	do	..	4	0
do	30	do	..	7	0
do	28	do	..	3	0
do	25	do	..	0	0
do	22	do	..	4	0
do	20	do	..	2	1
do	18	do	..	1	0
do	15	do	..	9	1
do	12	do	..	11	1
do	10	do	..	2	0
do	8	do	..	0	2
do	5	do	..	4	4
do	2	do	..	14	8
do	less than 2 acres	..		0	13
Total number of occupants				81	30

One occupant holds only garden land

4. Of these, 69 cultivate their lands themselves two of them doing so partly. The holder of garden land only cultivates his bit, 23 cultivate both dry and garden land (out of 29), and 43 cultivate dry land only (out of 53). The following is the classification of cultivating holders :

				dry garden	
cultivating occupants					
holding	200 acres and more	..		1	0
do	100	do	..	3	0
do	75	do	..	4 +	0
			1 partly		
do	50	do	..	5	0
do	40	do	..	4	0
do	35	do	..	3	0
do	30	do	..	7	0
do	28	do	..	2	0
do	25	do	..	0	0
do	22	do	..	4	0
do	20	do	..	2	1

				dry	garden
cultivating occupants					
holding 15 acres and more	..	9	0		
do 12 do	..	8+	1		
		1 partly			
do 10 do	..	2	0		
do 8 do	..	0	2		
do 5 do	..	4	4		
do 2 do	..	8			
do less than 2 acres					

5. Of these 69 cultivating occupants, one is a blacksmith who pursues cultivation as a subsidiary profession and five of them with agriculture as main occupation have additional work : one is the *patwari* two are sowcars (one of these being the *mali patel*) one a shepherd and one the police patel. Sixty-three of the cultivating occupants depend entirely on cultivation for their livelihood.

6. Of the 13 non-cultivating occupants, one holding more than 100 acres dry land has absconded on account of too much debt on his shoulders, and his land is lying fallow. Details of the other 12 are—

goldsmith	..	1
marwady sowcar	..	1
pathan sowcar	..	1
beggar	..	1
woman	..	1
donothings	..	7

12

7. The following statements show acres 1,416-16 dry land and acres 66-13 garden land as having changed hands during the last twenty-five years. While the transfer to non-cultivating occupants is not negligible, the transfer to cultivators—particularly from non-cultivators, deserves special notice. This fact and the extent of fallow land, namely, acres 150-33 dry land, is on account of the comparative inferiority of the rocky soil. Price of dry land ranges between B.G. Rs. 40 and B.G. Rs. 60 per acre, that of garden land between B.G. Rs. 80 and B.G. Rs. 110. As in Khupta, every one of the transfers from raiyats to sowcars (in some cases, raiyat sowcars) has had a “bynama” and a “kabuliath”, and before these documents were executed by the cultivators, they were invariably subjected to very heavy accumulations on loans as a

rule small originally. The raiyats do not trouble themselves with accounts and attach thumb impressions year after year in the account books of the sowcars. It is by this process small debts became big ones, and land was sold for amounts neither borrowed nor lent really.

8. A typical example for the oppression on the raiyat is the "savai" system. He is told that he should pay B.G. Rs. 125 for Rs. 100 lent, and he is told that the interest rate is "sal savai", that is, 25 per cent. annually. But invariably the raiyat gets loans this side of July and he is bound by agreement to pay interest and principal or to renew his thumb impression after adjustment of accounts, between "nag diwali" (about the last week of November or the first week of December) and "holi" (about the middle of March). The bulk of them repay in December—as soon as they sell their first *kapas* pickings, and thus 25 per cent. is paid or charged for about 6 months longest.

9. Next agricultural season, the raiyat again goes to the sowcar—in June or in July. Money is lent only after another consolidated loan is documented in the *kathapatti* and the thumb impression of the raiyat is again taken. And then, "savai" is added on to what remained after *nag diwali* repayment. Thus, while the believing raiyat honestly declares that he is paying "sal savai", he is being actually subjected to fifty per cent. real interest per annum. Examination of several individual cases of debt accumulations have clearly shown that such surreptitious practices were very largely being resorted to by the sowcars till 4-5 years ago. Now the iniquitous levies are comparatively less, yet by no means passable.

		Dry	Wet				
52	19	6-36	..	Sirpathi Devarao J.	Ganvana Pandu	7	Sale.
53	145	24-37	..	{ Sama Amritha Bhikka Ganeshyam Sonar.	{ Bapu Ananda Bhuthekar Narayan Vala	12	Sale.
Total acres				1416-16 dry land and 66-13 garden land.			

10. Some of these new landholders claim to be cultivators in a sense. They do not handle the plough, they are in essence rent-receivers, yet, they directly contribute towards agricultural work on the fields. Many of them supervise the maintenance of bulls and implements, preserve manure and seed, and get the human labour part of it done by labourers on the "sharkath" or "angvata" system; that is, one-eighth or one-twelfth of the gross produce of land is paid to the labourer on account of his personal labour, and the balance goes to the landholder. It would be rather unreal to call these labourers working on a percentage basis, tenants because these have no discretion whatever with regard to the crop to be reared and such other items requiring judgment. Of course, the actual tiller of the soil is treated better by these semi-agriculturists than by the out and out absentee-landlords.

Agricultural Tenancies.

11. There are 19 tenancies, all written agreements. Almost all these are from original owners to present occupants, and the former fondly cherish the false idea that if they paid the money mentioned in the respective sale-deed, the land would once again become their own. The extent of land held on tenancy terms is acres 302-35 dry land and acres 18-24 garden land, that is, 99 per cent. of dry land and 14·4 per cent. of garden land.

in 1 case for 6 years

„ 4 cases for 5 „

„ 5 „ 3 „

„ 1 case 2 „

„ 8 cases 1 year

The tenants have been on the respective lands.

in 1 case for 14 years

„ 4 cases 1 years each

„ 2 „ 3 „

„ 6 „ 2 „

and in 6 „ 1 year each

Agricultural Labourers.

12. Out of the 100 resident families, 49 are neither occupants nor tenants of agricultural land. Their details are:--

potter	..	1
shepherd	..	1
beggars	..	7
cobbler	..	1
kalal	..	1
drum-beater	..	1
barber	..	1
carpenter	..	1
goldsmith	..	1
blacksmith	..	1
women dependents	..	2
daily wage-earners	..	31
		<hr/>
		49

13. Of the 31 labourers' families, 9 are of mahars and 7 of mongs. Three mahar families hold land other than the small *inam* bits in the yields of which every mong and mahar family has an infinitesimal share. The daily wages are paid in B.G. currency at six annas for men and three annas for women. The annual pay for whole-time agricultural labourers is B.G. Rs. 100 plus clothing or B.G. Rs. 70 plus food and clothing.

Land Mortgage Debt

14. Many of the original, oral land mortgage debts having by now become regular sales, the extent yet in the mortgage stage is small. The five cases of land mortgage are on the security of acres 76-31 dry land and acres 2-10 garden land. The estimated value of this area is B.G. Rs. 2,300 and the debt is B.G. Rs. 1,850. Three of the documents are registered, two are on stamped paper but not registered.

15. One is a case of mortgage with possession, without any time limit: when the debtor pays the money back, he will get his land back. Two are cases of mortgage with possession involving conditional sale if the money is not cleared off within the specified time limit. Two are simple mortgages without possession, one similarly involving conditional sale and carrying 24 per cent. interest, the other being an instalment loan in which principal and interest

have been compounded into fixed annual payments for a specified number of years.

16. The money-lenders are :—

in 2 cases Mahratta raiyats
 „ 2 „ a Pathan butcher
 and „ 1 case a Marwady sowcar

17. The mortgage debts are due in one case to unjust accumulation, and in four cases raised for clearing off prior debt.

18. Three loans were raised a year ago and two four years ago. Accounts were seen and adjusted in all the five cases about a year ago.

Other Debt.

19. The kapas crop was poor and only few payments were made this kapas season. A few more might pay when they thresh their *rabi* jawari. So, the present debt includes the funded debt which goes on from year to year and about 75 per cent. of the debts incurred during the year for agricultural expenses, etc.

20. Out of the 100 resident families, forty are indebted and sixty debt-free. Of the forty, one family owes only mortgage debt, three families owe both kinds of debts and 36 families owe only non-land mortgage debt.

21. Debt of this kind amounts to B.G. Rs. 13,861 and the total debt of both kinds of the resident families is B.G. Rs. 15,711. Taking non-mortgage debt only into consideration, the debt per average indebted family works at B.G. Rs. 355-6-7. Taking all debts into account, the debt into account, the debt per resident family would be B.G. Rs. 157-1-9.

22. The 64 non-mortgage borrowings are singularly free from conditions regarding supply of crop to lender. Sixty-two debts are on personal security, one on the security of personal service and one on both crop and personal security.

23. Fifty-one are recorded on stamped paper, 3 on plain paper and 10 are oral transactions. None of the 64 cases has been registered.

24. B.G. Rs. 2,560 of this non-mortgage debt is for money-lending, but the bulk of it has been lent to people outside the village. Yet, if this amount be considered as not

constituting a part of the real debt of the villages the two respective averages would be

B.G. Rs. 289-12-4

and B.G. Rs. 131-8-2

Of this debt,

B.G. Rs. 5,104 is due to one Arab sowcar living at Jaffarabad, and B.G. Rs. 3,545 to a Mahratta raiyat living at Sipora Jadeed.

25. These debts are

in 4 cases of B.G. Rs. 1,000 and more	
in 1 case of B.G. Rs. 500	„
in 9 cases of B.G. Rs. 250	„
in 12 cases of B.G. Rs. 100	„
and in 13 cases of less than B.G. Rs. 100 each.	

26. Rates of real interest charged are :—

75 per cent for the season in	1 case
37½ do	2 cases
25 do	11 „
24 do	26 „
18 do	8 „
15 do	1 case
and 12 do	11 cases
	<hr/> 60 <hr/>

One is an instalment loan and three carry no interest.

27. The debts have lasted for

22 years in	.. 1 case
20 do	.. 1 „
10 do	.. 1 „
8 do	.. 2 cases
7 do	.. 3 „
6 do	.. 1 case
5 do	.. 3 cases
4 do	.. 7 „
3 do	.. 15 „
2 do	.. 1 case
1 year in	.. 23 cases
and less than 6 months	.. 6 „

28. Accounts were settled

in 2 cases about	4 years ago
in 2 do	3 do
in 2 do	2 do
in 49 do	1 year ago
in 2 do	10 months ago
in 2 do	5 do
in 1 case about	4 do
in 3 cases about	1 month ago
in 1 case about	15 days ago

64

In cases in which accounts have not been settled even once after the original borrowings (on account of these being recent or for some other cause), the dates of the latter are considered as the respective dates of settling accounts

29. The money-lenders in the 64 borrowings are :—

Mahratta raiyats	in 43 borrowings
Arab sowcar	.. 9 do
Deccani Mahomedan cloth merchant	.. 1 case
Rohilla sowcars	.. 4 cases
Brahman village officer	.. 1 case
Marwadi sowcars	.. 4 cases
Mahratta sowcar	.. 1 case
and not ascertainable	.. 1 case

64

30. Main causes for the 39 debts are :—

household expenses in	.. 19 cases
marriage expenses 13 ..
prior debt 7 ..
purchase of land 4 ..
non-agricultural business in	.. 4 ..
cultivation expenses 8 ..
purchase of bulls 4 ..
purchase of buffaloes 1 case
pilgrimage to Pandharpur ..	1 ..
having stood security for another person 1 ..
miscellaneous 1 ..
and medical expenses 1 ..

64

31. B.G. Rs. 7,161 is productive debt.

Seed Supply.

32. The raiyats mostly borrow seed, and in this case pay 50 per cent. more at the harvest time.

How produce is disposed of

33. Jawari, bajri and kapas (*barik* or long staple variety) are the kharif crops, while wheat and Bengal gram are the chief rabi crops. Sugar-cane is grown in these areas once in 4-5 years in garden land, but the raiyats are tending to give it up as a costly crop not sufficiently paying for the trouble and outlay. There are 9 agricultural wells being used for cultivation. Saleable produce mostly goes to Chikli, Chikli Taluqa (Berar). Little goes to Jalna.

General.

34. Milk supply is rather poor on account of the poor attention paid to cattle by the raiyats. The staple grain is jawari. Very few people take to drink, and this very rarely. The health of the villagers is not bad, but not so good as that of Khupta or Bun Kinola. There are two drinking water wells of which only one is used. But throughout the year the people use water from the brook running by (*Kalnadi*): in summer they dig pits and get water in the river bed.

35. Statistics from village records (1339 F.) are :—

bulls	..	190
cows	..	68
he-buffaloes	..	3
she-buffaloes	..	44
sheep	..	294
goats	..	136
ploughs	..	25
carts	..	28

36. Five persons are literate in Mahrathi : no one knows Urdu or English. There is no panchayat spirit among the population, but no one has yet gone to court for redress of grievances.

37. Economically, Sipora Jadeed is hard hit on account of some aggressive landholders and money-lenders living at Jaffarabad. The soil is poor, yet the enthusiasm and industry of the raiyat to make the best of the soil is clearly visible. Freed from heavy interest and the land-grabbing tendency on the part of a few persons in and near Sipora, the raiyats of Sipora show good promise of prosperity.

NIRKHED

(*Jalna Taluq*).

Nirkhed is about 14 miles to the east of Jalna. The soil is fairly fertile, crops do not fail generally, and the raiyats pay off their annual dues punctually. At the time of the investigation the resident families number 66 and the population is 441.

Landholdings.

2. The area of the village is distributed as follows :—

	Acres
dry land	1236-10
garden land	26- 0
phoot-kharab	21-23
rivers, channels, etc. ..	19-11
" Gavtan "	2-26
gairan, etc.	645- 2
Total area of village ..	<u>1951-32</u>

3. Pattadars number 25, and in only one patta the lands are held by persons quite different from the pattadar or his heirs. The actual number of occupants is 42, classified thus :—

				dry	garden
occupants holding 300 acres and more ..				1	0
" 100				1	0
" 75				0	0
" 50				1	0
" 40				1	0
" 35				2	0
" 30				2	0
" 28				1	0
" 25				3	0
" 22				4	0
" 20				0	0
" 18				4	0
" 15				5	0
" 12				2	0
" 10				1	0
" 8				8	0
" 5				1	0
" 2				4	0
" less than 2 acres ..				1	8
	Total			<u>42</u>	<u>8</u>

All the 8 garden bits are held by people holding dry land in addition. Of these 42 occupants, 30 cultivate their own lands in full, one does so partly, and 11 are non-cultivating owners. Details of the 11 non-cultivating owners are : one sowcar, 2 women, 1 beggar and 7 do-nothings.

4. The 31 cultivating occupants are classified thus :—

cultivating occupants holding		dry garden	
	300 acres and more ..	0	0
"	100 " ..	1	0
"	75 " ..	0	0
"	50 " ..	1	0
"	40 " ..	1	0
"	35 " ..	2	0
"	30 " ..	0	0
"	28 " ..	1	0
"	25 " ..	2	0
"	22 " ..	1	0
		partly	
"	20 " ..	0	0
"	18 " ..	4	0
"	15 " ..	4	0
"	12 " ..	0	0
"	10 " ..	1	0
"	8 " ..	8	0
"	5 " ..	1	0
"	2 " ..	3	0
"	less than 2 acres ..	1	8
Total ..		30	8
		1 partly	

Of these 31, 2 are beggars, one a sowcar and 28 depend entirely on agriculture.

5. The size of the average dry land holding works at
 acres $\frac{1,236-10}{42}$ = acres 29-17 nearly,
 and of garden land holding works at
 acres $\frac{26-0}{8}$ = acres 3-10 nearly.

6. The accompanying statements show land transfers during the last 25 years at acres 50-2 dry land and acre 1-8 garden land. In this respect Nirkhed, by local opinion, does not seem to represent the general state of affairs in the surrounding tract.

		50- 2
			1- 8				

7. Acres 83-19 is fallow on account of infertility of land.

There are 7 agricultural wells all in good condition.

Agricultural Tenants.

8. Acres 613-27 dry land and 2-0 garden land is held on tenancy terms under 20 tenancies. Thirteen of the tenants are landless. This works at 47·9 per cent. of dry land and 7·7 per cent. of garden land. Fifteen of them are on money terms, five on crop terms. The tenancy contracts are for—

10 years in	.. 5 cases
9 ,,	.. 1 case
7 ,,	.. 3 cases
5 ,,	.. 3 ,,
4 ,,	.. 1 case
3 ,,	.. 1 ,,
and 1 year in	.. 6 cases

The tenants have been on the concerned land for—

14 years in	.. 3 cases
8 ,,	.. 1 case
7 ,,	.. 1 ,,
5 ,,	.. 5 cases
4 ,,	.. 1 case
3 ,,	.. 3 cases
2 ,,	.. 3 ,,
and 1 year	.. 3 ,,

Agricultural Labourers.

9. Of the 73 families permanently resident in this village, 7 are out temporarily for harvesting. Of the remaining 66, 18 have neither occupancies nor tenancies. Details are—

domestic servant	..	1
washermen	..	3
drum-beater	..	1
shepherd	..	1
carpenter	..	1
coolies	..	11

Of these, 11 are mahar families and one a mong family.

10. Daily wages are between 5 and 6 annas B.G. for men and 3 to 4 annas for women. Money wages are prevalent as a rule. Annual payment for agricultural "nowkers" ranges from B.G. Rs. 80 to B.G. Rs. 110 according to the experience of the worker.

Land Mortgage debt

11. There is only one case of land mortgage, the extent of land mortgage being acres 5-27 dry land. Estimated value of this is B.G. Rs. 200 and the debt is B.G. Rs. 100. It is a simple mortgage carrying 24 per cent. interest, with a condition that if the land is not redeemed within 3 years, the mortgage deed will automatically become a sale-deed. The deed is registered. The money-lender is a Mahratta raiyat. The main cause for the debt is litigation. The debt was incurred a year ago.

Other Debt.

12. Of the 66 families resident at Nirkhed at the time of investigation, 27 are indebted; one owes land mortgage debt only. The 26 non-land mortgage debts amount to B. G. 2,793-8-0 and 19 pallas 32 seers of jawari. Converting the jawari loans to money terms at current local rates, total debt amounts to B.G. Rs. 3,005-8-0, giving an average of B.G. Rs. 115-9-6 per indebted family. Divided among the 66 families of the village, the total debt would distribute at B.G. Rs. 47-1-0 nearly per family.

13. The 26 non-mortgage debts comprise 40 borrowings which are based on these securities :—

crop security	..	36.)
personal „	..	3
sheep „	..	1

14. The kharif crop was good and most of the raiyats made payments during *nag diwali*. So, the present debt more or less represents the funded debt of the village which goes on from year to year—to decrease in specially good years, to increase during lean years.

15. The 40 borrowings are based—
 on plain paper in .. 19 cases
 on stamped paper „ .. 9 cases

16. and on oral agreements,, .. 12 „

According to amounts, the 26 debts stand classified thus :—

debt of B.G. Rs. 1,000 and over	..	0
„ 500 „	..	0
„ 250 „	..	3
„ 100 „	..	12
less than B.G. Rs. 100	..	11

Total	..	26
-------	----	----

17. Rates of real interest in the 40 borrowings are—
 50 per cent for the season in .. 2 cases
 25 " ..11 "
 24 " ..27 "

18. They are of the following duration—
 4 years in .. 6 cases
 3 " .. 7 "
 2 " .. 5 "
 1 year in ..18 "
 and less than a year .. 4 "

19. Accounts were settled—

4 years ago in	.. 1 case
3 "	.. 2 cases
2 "	.. 1 case
1 year ago	..12 cases
10 months ago	.. 1 case
4 "	.. 1 "
2 "	..22 cases

In cases in which accounts have not been settled even once after the original borrowings (on account of these being recent or for some other cause), the dates of the latter are considered as the respective dates of settling accounts.

20. The money-lenders in the 40 borrowings are—

Brahman broker in	.. 1 case
Mahratta raiyat "	..17 cases
Mahratta broker "	.. 3 "
Mahratta weaver in	.. 1 case
" sowcar	.. 1 "
" shepherd	.. 1 "
Lambadi woman	.. 1 "
" raiylats in	.. 9 cases
Marwadi sowcar in	.. 1 case
Kalal broker in	.. 5 cases

The village is not subject to heavy exactions by any sowcar or big landlord.

21. Main causes for the 40 borrowings are—

cultivation expenses in	..16 cases
household expenses in	..14 "
marriage in	.. 5 "
purchase of land	.. 2 "
" bulls in	.. 1 case
" sheep	.. 1 "
" buffalo	.. 1 "

22. B. G. Rs. 1,877 out of B. G. Rs. 3,005-8-0 is productive debt.

Seed Supply.

23. Very few borrow seed: the village consists of prudent and industrious small peasants who always preserve their grain for seed.

How produce is disposed of.

24. Kapas and other saleable produce goes to Jalna. All things are weighed. The only important kharif crop is kapas, rabi crop is jawari, wheat and Bengal-gram.

General.

25. Milk supply is rather poor and does not suffice for the needs of the villagers. Little of ghee is sold outside. Staple food is jawari. Wheat is used by the upper classes. The general standard of life is simple and healthy. The village gets its drinking water from a brook nearly all the 12 months—out of pits dug in the river course during summer.

26. Statistics from village records (1339 F.) are—

bulls	..	186
cows	..	76
buffaloes	..	33
goats and sheep	..	216
ploughs	..	16
carts	..	20

27. There are 14 persons literate in Mahrathi, no one in Urdu or English. No one has yet gone to court for settlement of disputes though the panchayat way of settling is no longer in operation.

23. The general view is that this tract is subject to heavy oppression at the hands of Rohilla brokers, sowcars and landholders, but Nirkhed gives little evidence of this. The truth appears to be that in recent years these Rohillas have materially altered their ways and rates on account of changing circumstances. Nirkhed may be slightly better off than the average Jalna village, but from what was seen of other villages during short halts and discussions, other villages in the Taluqa are not much worse off than Nirkhed.

BUN TAKLI

(Ambad Taluq)

Bun Takli (Vanzar Wadi) is about 8 miles from Ambad Town, the cart track running round a small range of hills. The number of resident families is 83 and the population 460.

Landholdings.

2. Of the 103 survey numbers,

acres 2408-27	constitute	dry land,
„ 15-31	„	garden land
„ 48- 2	„	phoot-kharab among
		survey numbers
„ 149-31	„	gairan, etc.
„ 8-13	„	gavtan,
„ 9-18	„	roads, etc.,
„ 9-10	„	channels, etc.

Total acreage 2649-12

3. Pattadars number 46. In 4 pattas lands are held by persons in no way related to the pattadars. The actual number of occupants is 64 who stand classified thus :—

occupants holding	200 acres and more	dry	garden
„	100	.. 2	0
„	75	.. 2	0
„	50	.. 2	0
„	40	.. 7	0
„	35	.. 0	0
„	30	.. 4	0
„	28	.. 10	0
„	25	.. 5	0
„	22	.. 6	0
„	20	.. 4	0
„	18	.. 1	0
„	15	.. 3	0
„	12	.. 5	0
„	10	.. 5	0
„	8	.. 1	0
„	5	.. 3	0
„	2	.. 1	0
„	less than 2 acres	.. 1	6
		.. 2	0
	Total	.. 64	6

All the garden land is held along with dry land.

4. Cultivating occupants number 52, of whom 4 cultivate part of their lands. Classified according to sizes of their holdings, they stand thus :—

		dry garden	
occupants holding	200 acres and more	.. 2	0
„	100	.. 2	0
„	75	.. 2	0
„	50	.. 5	0
		1 partly	
„	40	.. 0	0
„	35	.. 3	0
„	30	.. 7	0
		1 partly	
„	28	.. 4	0
„	25	.. 3	0
		1 partly	
„	22	.. 2	0
		1 partly	
„	20	.. 1	0
„	18	.. 3	0
„	15	.. 4	0
„	12	.. 4	0
„	10	0
„	8	.. 3	0
„	5	.. 0	0
„	2	.. 1	5
			1 partly
„	less than 2 acres	.. 2	0
		48	5
		4 partly	1 partly

The size of the average dry land holding works at

$$\text{acres } \frac{2408-27}{64} = \text{acres } 37-25 \text{ nearly,}$$

and of the average garden land holding works at

$$\text{acres } \frac{15-31}{6} = \text{acres } 2-25 \text{ nearly.}$$

5. The 12 non-cultivating occupants are engaged thus :—

sowcar and grocer	..	1
sowcar	..	1
grocer	..	1
coolie	..	1
agricultural tenant	..	1
agriculture	..	1 (in another village)
woman	..	1
donothings	..	5

6. Of the 52 cultivating occupants, 10 have subsidiary occupations, and 4 (3 sowcars and 1 shepherd) pursue cultivation as an additional occupation. The ten subsidiary professions concerned are—

goldsmith in	.. 1 case
sowcar in	.. 4 cases
cloth merchant in	.. 1 case
mali patel in	.. 1 „
and coolie work in	.. 13 cases

Thirty-eight depend entirely on cultivation for their livelihood.

7. The area of land transferred during the last 25 years, as the accompanying statements show, comprise acres 736-38 dry land and acres 4-0 garden land. Much of the land-grabbing in this tract appears to have been by Mah-ratta and Kannady sowcars, most of these being cultivators themselves. The practice of extracting unjust “ bynamas ” (sale-deeds) on oral promise of return, widely prevalent at Khupta and Sipora Jadeed, is also prevalent in this region.

Grand total	..	736-38d
acres		4-0g	..						

8. Acres 51-8 dry land and 4-0 garden land is fallow, major portion of which is due to family dispute.

9. Eight agricultural wells are all comparatively useless because water fails in summer. The price of agricultural land is B.G. Rs. 30 to 40 per acre of dry land and B.G. Rs. 50 to 60 per acre of garden land.

Agricultural Tenancies.

10. Eighteen tenancies comprise acres 424 -20 dry land comprising 17·6 per cent. of total occupied dry land area. Three are landless tenants. Eight tenancies are in money terms, 9 in crop terms and one in terms of both. They are contracted for the following periods—

12 tenancies for	..	5 years each
1 tenancy for	..	4 „
2 tenancies	..	3 „
3 „		1 year

The concerned tenants have been on their lands—

hereditarily in	..	1 case
for 5 years in	..	1 „
for 4 years in	..	2 cases
for 3 years in	..	4 „
for 2 years in	..	3 „
and for 1 year in	..	7 „

All the tenancy agreements are written and stamped.

Agricultural Labourers.

11. Twenty-five of the 83 resident families have neither agricultural occupancies nor tenancies. Their details are

coolies	16
shepherds	3
beggars	3
mulla	1
police patel	..	1
mali patel	..	1

Of these 25 families, 8 are mahar and 4 mong families.

12. Men get B.G. 6 annas per day, women 3 annas per day. In good season, the wage goes up to 12 annas and 8 annas respectively.

Land Mortgage Debt.

13. Six land mortgages comprise acres 132-20 dry land estimated at B.G. Rs. 4,150. The mortgage debt is B.G. Rs. 1,480. Two are with possession, one involving sale

if the land be not redeemed within 3 years. Four are simple mortgages, one of them involving sale if the land be not redeemed within 5 years. The rate of interest in 2 simple mortgage cases is 24 per cent. In one case, the mortgage is to be redeemed after five years without any charge, half the crop for 5 years serving as compensation for principal and interest (the land being in the possession of the debtor and cultivation being by him). A fourth simple mortgage is against an instalment loan.

14. Of the mortgagees, three are Mahratta raiyats, one Mahratta sowcar, one Mahratta shepherd and one Rajput sowcar.

15. Causes for the 6 mortgages are

cultivation expenses in	..	2 cases
litigation in	..	2 „
prior debt in	..	1 case
and marriage expenses	..	1 „

16. They have lasted for 8, 4, 4, 3, 3 and 1 year respectively.

17. Accounts were settled in the two simple mortgage cases one year ago.

18. In five cases stamped paper is used, in one case the mortgage is an oral agreement.

Other Debts.

19. At the time of investigation, those that could pay something to their respective sowcars have already done so, but many could not pay on account of a poor crop. Therefore the "other" debt comprises a portion of the expenses of the last agricultural season as also the accumulated debts of previous years.

20. Of the 83 resident families, 55 are debt free. Five have only land mortgage debt, and 23 owe debts based on security other than land. The total non-mortgage debt amounts to B.G. Rs. 4,017 (including the money value of one maund of jawari loan). The average per indebted family works at B.G. Rs. 174-10-5 nearly. Taking into consideration all debts and all families the average works at B.G. Rs. 68-10-3 nearly.

21. The 23 cases consist of 20 borrowing and these are based.

- 21 on crop security ✓
- 7 on personal security ✓
- 1 on sheep security
- and 1 on personal service.

22. Twenty of the borrowings are recorded on stamped paper, 8 on plain paper and one is oral. In another case the creditor holds a decree from a court of law.

23. In size the debts are of the following classes :

debts of B G	Rs. 1,000 and more	0
„	500	1
„	250	4
„	100	10
less than 100	..	8

24. Interest is charged at—

25 per cent. for the cultivation season in	..	1 case
24 per cent.	„	.. 7 cases
24 per cent. per year	„	.. 15 „
12 per cent.	„	.. 3 „
6 per cent.	„	.. 1 case

One is an instalment loan (where interest and principal have been compounded into a number of annual payments) and in two cases no interest is being charged.

25. The 30 borrowings are of the following duration :—

2 cases of 6 years each
3 „ 4 „
7 „ 3 „
6 „ 2 „
1 case of $1\frac{1}{2}$ „
8 cases of 1 year each
1 case of 5 months
1 case of 2 months
and 1 case of 15 days

Accounts were settled : —

in 1 case 3 years ago
in 4 cases 2 „
in 1 case $1\frac{1}{2}$ „
in 11 cases 1 year ago
in 1 case 6 months ago
in 3 cases 4 „
in 6 cases 2 „
and in 2 cases 15 days ago

In cases in which accounts have not been settled even once after the original borrowings (on account of these being recent or for some other cause), the dates of the latter are considered as the respective dates of settling accounts.

26. The money-lenders are :—

in 8 borrowings	Kannady raiyats
in 8 „	Mahratta raiyats
in 1 case	Murahatta sowcar
in 3 cases	shepherds
in 1 case	An Arab sowcar
in 2 cases	Cutchi sowcars
in 1 case	a Rohilla
in 3 cases	Marwadi sowcars
in 1 case	a Brahman sowcar
in 1 case	a Rajput sowcar
and in 1 case	a mahar raiyat

27. There is no particular sowcar to whom the village is heavily indebted. Much of the old debt was years ago converted into *bynamas* transferring occupancy rights of lands.

23. Main causes are

in 11 cases	cultivation expenses
in 1 case	non-agricultural business (grocer)
in 1 „	land revenue payment
in 6 cases	marriage expenses
in 6 cases	household expenses
in 2 „	litigation
and in 3 cases	prior debt

29. B.G. Rs. 1,407 out of B.G. Rs. 4,017 is productive debt.

Seed Supply.

30. Majority of the raiyats preserve seed for sowing. The raiyats have not received and help from the Agricultural Department.

How produce is disposed of.

31. Saleable produce is taken to Ambad and Jalna. The main kharif crops are kapas and bajri. Rabi crops are jawari and wheat. Nowadays the rabi crop is going down on account of insufficient water supply. All produce is weighed.

General.

32. Milk is quite insufficient for the village. The raiyats use bajri and jawari indifferently for their staple food. General health is not so good as that of Kupta or Bun Kinola, but moderate. It is said that famine visits Ambad Taluqa oftener than the northern taluqas.

33. There are 3 drinking water wells, but all have some bad odour, specially in summer time. There is no cycle nor sewing machine in the village.

34. Statistics from the village records (1339 F.) are :—

bulls	166
cows	101
buffaloes		..	21
sheep and goats		..	343
ploughs		..	16
carts	19

35. Twelve of the villagers are literate in Mahrathi, no one in Urdu or English. Six raiyats have gone to courts to settle disputes. There is no panchayat organisation in this village.

36. Bun Takli is surrounded by hilly tract and toddy trees. There are a few well-to-do cultivating landholders, but the bulk of the population is poor and dispossessed of their lands. The soil is good but the tiller who has been expropriated lacks in enthusiasm and health.

BOREGAON KHURD.

(Ambad Taluqa).

Situated to the east of the Taluqa, Boregaon is about 10 miles from Ranjani, a station on the Hyderabad-Godavery Valley Railway. The resident families number 55 and the population is 389.

Landholdings.

2. The area of the village is distributed as follows :—

dry land	Acres	1752-26
garden land	„	79-17
gavtan ..	„	7-13
gairan ..	„	272-36
phoot-kharab	„	21-36
roads, etc.	„	1-21
Total Area		„ 2135-29

3. There are 34 pattadars. In 6 pattas, the lands are held by persons in no way related to the respective pattadars. The actual number of occupants is 46. The size of the average dry land holding works at

$$\text{acres } \frac{1752-26}{46} = \text{acres } 38-4 \text{ nearly}$$

and the size of the average garden land holding is

$$\text{acres } \frac{79-17}{28} = \text{acres } 3-7 \text{ nearly}$$

4. The 46 occupants are classified thus :—

				dry garden	
occupants holding	100 acres and more	..	4	0	
„	75	„	1	0	
„	50	„	8	0	
„	40	„	2	0	
„	35	„	2	0	
„	30	„	6	0	
„	28	„	2	0	
„	25	„	0	0	
„	22	„	3	0	
„	20	„	2	0	
„	18	„	0	3	
„	15	„	2	1	
„	12	„	2	0	

occupants	10	and more	dry	garden
"	8	"	4	0
"	5	"	3	1
"	2	"	2	3
"	less than 2 acres	"	1	7
			2	13
Total ..			46	25

All the garden bits are held along with dry land.

Of these 46, 40 cultivate their own lands, 2 of them do so partly. Six do not cultivate.

5. Classified according to sizes of holdings, the cultivatin occupants stand thus :—

cultivating occupants	dry	garden
holding 100 acres and more .	3	0
" 75	0	0
" 50	5+	0
		1 partly
" 40	1	0
" 35	1+	0
		1 partly
" 30	6	0
" 28	2	0
" 25	0	0
" 22	3	0
" 20	2	0
" 18	0	0
" 15	2	1
" 12	1	0
" 10	4	0
" 8	3	0
" 5	2	3
" 2	1	5 +
	1 partly	
" less than 2 acres	2	13
Total ..		38+ 22 + 2 partly 1 partly

Of these 40, 2 have subsidiary occupations : one is a sowcar, the other a police and mali patel.

The 6 non-cultivating owners are :—

2 patwaris
1 minor
1 beggar
and 2 donothings.

6. The accompanying statements show acres 452-18 dry land and acres 2-12 garden land as transferred lands during the last 25 years. The practice of forcing *bynamas* from unwilling raiyats does not appear to be so widely prevalent in the south-east of the Aurangabad District as in the west and north.

		452-18	2-12					

7. Acres 39-12 constitute fallow land partly on account of inferiority of soil.

8. There are 11 agricultural wells out of which 5 supply water even in summer. The average price of land is B.G. Rs. 40 to 60 per acre of dry land and B.G. Rs. 80 to 100 per acre of garden land.

Agricultural Tenancies.

9. Acres 399-33 dry and 12-3 garden land are held on tenancy constituting 22·8 and 15·5 per cent. respectively. There are 15 tenancy contracts, one of the tenants being landless.

10. Six contracts are in money terms, five in crop terms, and four are in terms of both. Practically all the tenancy contracts are written on plain paper.

11. The contracts are—

one for	10 years each
three for	7 „
five for	5 „
one for	3 „
five for	1 year

The tenants have been on the respective lands

in	2 cases for	12 years each
„	3 „	10 „
„	3 „	5 „
„	2 „	4 „
„	2 „	3 „
„	1 case	2 „
	and in 2 cases for	1 year each.

Agricultural Labourers.

12. Of the 55 resident families, 20 are landless and tenancyless. They are—

1 temple servant
3 weavers
16 coolies

Thirteen of these 20 are mahar families.

13. Men get from B.G 6 annas to 8 annas per day, women 3 to 4 annas. In busy agricultural season, the daily wages tend to rise higher. Annual pay for agricultural “nowkers” ranges from B.G. Rs. 140 to B.G. Rs. 160 without food. Wages are paid mostly in money.

Land Mortgage Debt.

14. There is only one case of land mortgage, acres 7-21 dry and 2-38 garden land being mortgaged for B.G. Rs. 150, the estimated value of the land being B.G. Rs. 900. It is a simple mortgage involving sale if the land is not redeemed within 5 years, and interest is charged at 24 per cent. The mortgagee is a Brahman sowcar. The debt was incurred in order to liquidate prior debt, fourteen years ago. Accounts were settled 2 years ago.

Other Debt.

15. At the time of the inquiry, the annual payments by some raiyats to sowcars have already been made, but only of interest even in these cases. The year's crop (jawari) is very poor and therefore the raiyats have been unable to pay anything towards principal of debt incurred during the past agricultural season. The debt as it is shown in the table on " Other debts " is heavy, but it includes both prior debt and debt incurred during the past agricultural season.

16. Twenty-four families owe debts, and 31 are debt-free. One family owes only land mortgage debt, and so 23 families owe non-land mortgage debt. The total debt of this kind is B.G. Rs. 9,395 and the average debt per indebted family works at B.G. Rs. 408-7-8 nearly. Distributed among all the resident families, the total debt distributes itself at B.G. Rs. 173-8-9 nearly per family.

17. The 23 debts comprise 36 borrowings which are based 32 on personal security and 4 on crop security.

18. Ten are recorded on stamped paper, 22 on plain paper and 4 are oral agreements.

19. According to amounts, the 23 debts arrange themselves thus :—

Rs.		
1,000 and more	..3	debts
500	..1	debt
250	..7	debts
100	..5	..
less than 100	..7	..

20.	25 per cent. for the season is charged in	1 case
	24 per cent. do	.. 4 cases
	24 per cent. per annum is charged in	.. 11 „
	18 per cent. do	.. 2 „
	12 per cent. do	.. 4 „

No interest is being charged in 3 cases, in 2 cases on account of purchase of clothes, and in one case on account of purchase of a buffalo.

21. The debts have lasted for—

20 years	in	.. 1 case
12	„ „	.. 1 „
10	„ „	.. 1 „
7	„ „	.. 3 cases
6	„ „	.. 1 case
5	„ „	.. 5 cases
4	„ „	.. 5 „
3	„ „	.. 5 „
1½	„ „	.. 1 case
1 year	„	.. 10 cases
6 months	„	.. 1 case
3	„ „	.. 1 „
3 weeks	„	.. 1 „

22. Accounts were settled—

10 years ago	in	.. 1 case
3	„ „	.. 3 cases
1½	„ „	.. 1 case
1 year	„	.. 11 cases
6 months	„	.. 2 „
4	„ „	.. 9 „
3	„ „	.. 5 „
1½	„ „	.. 1 case
3 weeks ago	„	.. 1 „
2	„ „	.. 1 „
and 2 days ago	„	.. 1 „

In cases in which accounts have not been settled even once after the original borrowings (on account of these being recent or for some other cause), the dates of the latter are considered as the respective dates of settling accounts.

23. The money-lenders are—

Mahratta sowcars in	.. 19 borrowings
Do raiyats in	.. 5 „
Do weaver in	.. 1 borrowing
Marwadi sowcars in	.. 5 borrowings
Deccani Mahomedan butcher in	.. 1 borrowing
„ „ raiyat in	.. 3 borrowings
and a Lambadi raiyat in	.. 2 „

Debts due to three sowcars (one of them being a land holder in the village but living outside) amount respectively to

			B.G. Rs.
one Mahratta sowcar	5,302
a second Mahratta sowcar (owning land in the village)	1,267
a Marwadi sowcar	1,180
24. Main causes for the 36 borrowings are—			
marriage expenses in	.. 10	borrowings	
cultivation expenses	.. 13	..	
purchase of bulls	.. 2	..	
purchase of buffaloes	.. 2	..	
purchase of land	.. 2	..	
purchase of cart	.. 1	..	
purchase of clothes	.. 2	..	
trade	.. 1	borrowing	
accumulated debt	.. 2	borrowings	
and miscellaneous causes	.. 1	borrowing	

25. B.G. Rs. 4,853 is productive debt out of B.G. Rs. 9,395.

Seed Supply.

26. A high majority preserve seed for sowing. No help has been received from the Agricultural Department.

How produce is disposed of.

27. Saleable produce goes to Jalna, but very little kapas is grown. No grain goes out generally. The main kharif crops are bajri, kapas, horse-gram and til, while the rabi ones are jawari and Bengal-gram and kardi. No sugarcane is grown in this tract nowadays on account of heavy cultivation expenses. Jawari and other food grains are measured while kapas is weighed.

General.

28. Milk supply is rather poor, the price of fodder being high. There are 4 drinking water wells all in good condition and in use. Water does not fail in summer. The raiyats use jawari more than bajri as staple food. The standard of life is simple and healthy. Malaria is said to be common in this region in summer.

Statistics from village records (1339 F.) are :---

bulls	146
cows	76
buffaloes		..	43
sheep	76
ploughs		..	60
carts	17

30. Six persons are literate in Mahrathi. No one knows Urdu or English. There is a panchayat organisation which settles small local disputes. There are 4 litigants. There is one bicycle and 2 sewing machines.

31. Boregaon Khurd has good soil and the competition for land is keen. But much of the land is locked up in the hands of a few, and there is little room for the ambitions of hardworking raiyats.

DAREGAON.

(Pattan Taluqa.)

This is a village about the centre of the Taluqa, 14 miles from Pattan. The land is somewhat rocky and rather poor. The resident families number 74 and the population is 367.

Landholdings.

2. The area of the village is

	Acres
dry land	985-30
garden land	13-22
gairan	49-38
gavtan	12-26
roads, etc.	6- 3
phoot kharab among survey numbers	10-19
not suitable for cultivation	654-33
Total	1,733-11

3. There are 17 pattadars. In 2 pattas the lands are held by persons in no way related to the concerned pattadars. The actual number of occupants is 48. The size of the average dry land holding is

$$\text{acres } \frac{985-30}{48} = \text{acres } 20-21 \text{ nearly}$$

and the size of the average garden land holding is

$$\text{acres } \frac{13-22}{9} = \text{acres } 1-20 \text{ nearly.}$$

Classification of occupants according to sizes of their occupancies is as follows :—

			dry	garden
occupants holding	100 acres and more	..	1	0
do	75 do	..	1	0
do	50 do	..	2	0
do	40 do	..	1	0

do	10	do	..	6	0
do	8	do	..	0	0
do	5	do		16	0
do	2	do	..	3	3
do	less than 2 acres		..	1	6
				48	9

All the garden bits are held along with dry land.

4. Of these, 37 cultivate their occupancies in full, and 11 are non-cultivating occupants. The non-cultivating owners are engaged.

- 2 in sheep-farming
- 2 in coolie-work
- 4 in joshi-work
- 2 in begging
- one is a minor.

Of the 37 cultivating occupants, 3 have subsidiary occupations, namely, one a sowcar, one grocer and cloth merchant and one beggar. A *moazan* pursues cultivation as a subsidiary profession. Thirty-three depend entirely on cultivation.

5. Acres 76.3 dry land and 1.2 garden land were transferred during the past 25 years as shown in the accompanying tables. The comparatively very little transfer is not representative of conditions prevalent in the neighbourhood. The explanation for this lies, partly in the poverty of the soil of Daregaon, but more in the intelligence and industry of the raiyats of Daregaon who refused to be victimised by sowcars who abound in number in the near neighbourhood. In fact the raiyats themselves voluntarily opine that if conditions around were as at Daregaon, the situation in Pattan Taluqa would be very much better than at present.

VILLAGE DAREGAON.

Statement of Land Transfers.

Khata Survey No.	EXTENT			From	To	How many years ago	How transferred
	Dry	Wet	Garden				
9	26 21-11	Jayawantha Ranganath Patwari.	Daulatrao R. J.	10	Debt developed to sale
12	31 5-24	..	1-2	Bhagawantharao	Lahnu Gangaram	25	Sale.
..	25 11-6	Thukaram			
18	46 23-7	Bheemabai Kundalike Dhangar.	Triumbak Nama Dhangar.	5	Debt developed to sale.
15	32 7-14	Ramchander Saluba	Bapuji Jayawantha Rao..	3	Redemption without charge after 10 years.
16	45 7-21	Lalu Khandu Dhangar	Sadasive Yeswantha Rao	15	Mortgage with possession (ended in sale).
	76-3	..	1-2				

6. Acres 5-39 is fallow on account of inferiority of soil. All the agricultural wells dry up in summer. Yet, competition for land is very keen on account of pressure of population. The price of an average acre of dry land ranges between B.G. Rs. 80 and 120, while garden land (on which jawari is grown during rabi season) is sold between B.G. Rs. 100 and 125.

Agricultural Tenants.

7. There are five tenancies. The are held on tenancy terms is acres 112-12 dry land and 1-2 garden land, constituting 11·6 and 7·7 per cent. respectively of total dry and garden area.

Agricultural Labourers.

8. Of the 74, 23 are landless and tenancyless. They are engaged—

- 12 in coolie-work
- 1 in blacksmithy
- 3 in cobblery
- 1 in sheep-farming
- 2 in brick-laying
- 1 in water-carrying
- 1 in oil-monging
- and 1 in begging

One is a woman dependent. Of these 23, 8 families, belong to the untouchable classes. Sheep-farming is a general subsidiary occupation in the case of all the resident families.

9. Men get between 6 and 8 annas B.G. per day as wage, women between 2 and 4 annas. No daily wages are paid in kind. B.G. Rs. 75 is paid with food and clothing for agricultural “nowkers”, B.G. Rs. 100 to 125 without food and clothing.

Land Mortgage Debt.

10. There is only one land mortgage, of acres 7-14 dry land, estimated at B. G. Rs. 1,000. The mortgage debt is Rs. 1,250. It is a *budith gahan* case in which the land will revert free of charge after 10 years. The document is on plain paper. The money-lender is a Mahratta raiyat. The cause for the debt was accumulation and the latest consolidation of it was 3 years ago.

11. In the neighbourhood land mortgage debt is heavy, but in this village it is very light. This is due to the

unwillingness of the raiyats to mortgage their lands : they have till now managed to keep on heavy debts on security other than agricultural land—as can be seen from the figures on non-mortgage debt.

Other Debt.

12. Eighteen of the 74 families are indebted : one has land mortgage debt only, and 17 have non-mortgage debts. The total non-mortgage debt amount to B.G. Rs. 5,635, yielding an average of B.G. Rs. 331-7-6 per indebted family. The total debt distributed among all the resident families works at B.G. Rs. 93-0-8 nearly. The debts are secured in 13 cases by crop and in 4 cases by personal security. One debt is on stamped paper and 15 are on plain paper. One debt is on oral agreement.

13. Classified according to sizes the debts are :—

B.G. Rs. 1,000 and more	..	2
„ 500	„	1
„ 250	„	2
„ 100	„	10
„ less than 100	..	2

14. Rates of interest levied are—

21 per cent.	in 2 cases
18	„ 7 „
15	„ 2 „
and 12	„ 1 case

Three are instalment loans, and 2 carry no interest (one being a business debt, the other being a sundry one).

15. The debts have lasted for—

25 years	in 2 cases
5	„ 1 case
3	„ 1 „
2	„ 4 cases
and 1 year	in 8 „

One is a sundry debt.

16. Accounts were settled last—

2 years ago	in 2 cases
1 year ago	„ 2 „
3 months	„ 7 „
2 months	„ 1 case
1 month	„ 2 cases
and 2 weeks ago	„ 2 „

One is a sundry debt.

In cases in which accounts have not been settled even once after the original borrowings (on account of these being recent or for some other cause), the dates of the latter are considered as the respective dates of settling accounts.

17. From this it is clear that the annual payments to sowcars were made before the investigation, and the debt recorded in the investigation represents more or less the accumulated debt (and interest thereon) of previous years. This heavy debt of B.G. Rs. 331-7-6 per indebted family is due to the poverty of the soil and the refusal of the cultivating raiyats to give up their proprietary rights on their lands.—

18. The money-lenders are

Mahratta raiyats in 14 cases,
Mahratta shepherd in 1 case,
and a Lingayat merchant in 1 case.

One is a sundry debt. B.G. Rs. 2,600 is due to a Mahratta raiyat of the village.

19. Main causes for the 17 debts are :—

marriage expenses	in 4 cases
cultivation expenses	„ 2 „
well-sinking	„ 1 case
purchase of land	„ 3 cases
purchase of bulls	„ 1 case
prior debt	„ 3 cases
household expenses	„ 1 case
miscellaneous	„ 2 cases

20. Out of B.G. Rs. 5,635, B.G. Rs. 1,350 is productive debt.

Seed Supply.

21. All the raiyats preserve seed.

How produce is disposed of.

22. Chief kharif crops are bajri and kapas, jawari and karad in rabi. The kapas that is grown is taken to Bhosa about 6 miles away for ginning, and then the *rui* is taken to Ambad and to Jalna.

General.

23. Milk supply is poor though the cattle are healthy. The staple grain is bajri. Water for drinking is scarce in summer and taken from a well in a declivity, full of worms. There is no particular disease to which the population is subject, and the general health is good : it should have been much better had Nature been a bit kinder.

24. Statistics from village records (1339 F.) are :—

bulls	..	166
cows	..	122
buffaloes	..	44
sheep and goats.		513
ploughs	..	31
carts	..	16

25. Seven persons are literate in Mahrathi. No one knows Urdu or English.

26. Daregaon is prominent in several grim-looking raiyats advanced in years but particularly diligent. The village lacks in middle aged and young workers but the bulk of agricultural land is in raiyats' families only, and in about a decade the present children should be able to manage the plough.

SIRI SAIGAON.

Gangapur Taluqa.

This is a village about three miles from Vaijnapur on the way from Gangapur to Lasur, a station on the Hyderabad Godavary Valley Railway. The resident families number 79, and the population is 389.

Landholdings.

2. The village area is distributed as follows :—

	Acres
dry land	1,124-39
garden land	12- 6
gairan	39-20
phoot-kharab (among survey numbers) ..	10-24
gavtan (village site)	6-21
roads, etc.	5-17
Total ..	1,199-7

3. There are 33 pattadars. In 3 pattas, lands are held by persons in no way related to the respective pattadars. The actual number of occupants is 51. The size of the average dry land holding works at

$$\text{acres } \frac{1,124-39}{51} = \text{acres } 22-2 \text{ nearly and of garden land}$$

$$\text{acres } \frac{12-6}{2} = \text{acres } 6-3 \text{ nearly.}$$

4. The occupants stand classified thus :—

			dry	garden
occupants holding 100 acres and more ..			2	0
do 75 do ..			2	0
do 50 do ..			3	0
do 40 do ..			3	0

do 8 do ..			1	0

			dry	garden
occupants holding	5 acres and more	..	3	2
do	2 do	..	5	0
do	less than 2 acres	..	13	6
			<hr/>	<hr/>
			51	2

The two garden bits are held along with dry land.

5. Of the 51, 38 are cultivating occupants and 13 non-cultivating. Their details are :—

sowcars	..	2
student	..	1
putwari	..	1
coolies	..	4
woman	..	1
carpenter	..	1
goldsmith	..	1
cashier	..	1
temporarily landless	.	1

6. Of the 38 cultivating occupants, 2 have subsidiary occupations, one is a mali and police patel, one a police patel. One carpenter pursues cultivation as a subsidiary profession. Thirty-five depend entirely on cultivation.

7. The cultivating occupants are arranged thus according sizes of their holdings :—

cultivating occupants holding	100 acres and more		dry	garden
do	75	do	1	0
do	50	do	2	0
do	40	do	2	0

do	less than 2 acres	do	13	0
			<hr/>	<hr/>
			38	0

8. The accompanying land transfers statements show acres 556-27 dry land as transferred lands during the past 25 years. Situated to the south of the District and about 10 miles from Ahmednagar District, Siri Saigaon appears to give a fairly typical picture of economic conditions in the Aurangabad District so far as methods and tendencies of land transfers are concerned. One Marwadi sowcar who owned no land in this village 25 years ago, now owns acres 122-19 dry land and has possession, by mortgage, of acres 45-37. The process of land transfer to him and several others is just of the same kind as at Khupta. An additional feature of bogus *bynamas* in this region is that the sale price is put very high, so that even if the raiyat seller were particular in getting back his land, the price he would have to pay would be prohibitive. Such high prices are fixed on the basis of the sowcar's accounts of dues from raiyats.

					Total dry land acres 556-27				

9. Acres 17-11 is fallow. Agricultural wells number 4 but not one is in use because water fails in summer, and the raiyats find garden cultivation very expensive and not paying. Albeit, competition for land is very keen (mostly on account of the demand by non-cultivating sowcars and grocers). The price of an average acre of dry land is so high as between B.G. Rs. 100 and 125.

Agricultural Tenancies.

10. Twenty-three tenancies comprise acres 335-27 dry land constituting 29·8 per cent. of total area of dry land. All tenancies are oral contracts. Two of the tenants are landless. The tenancy contracts are 3 in money terms and 20 in crop terms. The contracts are for—

6 years	in	..	1 case
and 11 months	,,	..	22 cases

11. The concerned raiyats have been on the respective lands for—

7 years	in	..	1 case
6	,,	..	2 cases
5	,,	..	5 „
4	,,	..	2 „
3	,,	..	3 „
2	,,	..	2 „
and 1 year	in	..	9 „

12. In the case of one tenancy, part of a survey number was held by the tenant for a certain number of years, and the rest for a different period (he having taken up the latter portion at a later date).

Agricultural Labourers.

13. Twenty-eight of the 79 resident families are landless and tenancyless. Their details are :—

gosayi	..	1
washerman	..	1
mason	..	1
oil-monger	..	1
dependent	..	1
shopkeeper	..	1
coolies	..	22

Three of these are mahar families.

14. Daily wages range from B.G. 5 to 6 annas for men and 2½ to 3 annas for women. Wages in kind are paid rarely. Agricultural nowkers are paid from B.G. Rs. 100 to 125 per annum.

15. Sheep-farming is a general subsidiary occupation for all householders.

Land Mortgage Debt.

16. There are 18 land mortgages, involving acres 358-19 dry land and 12-6 garden, estimated at B.G. Rs. 33,000. The total land mortgage debt is B.G. Rs. 4,151-9-0 and O.S. Rs. 7,234-15-10 (excluding 2 cases where the debt amounts are not ascertainable). These O.S. debts are due to the Aurangabad Co-operative Central Bank.

17. Nine cases are mortgages with possession, of which one involves conditional sale if the land is not redeemed within 5 years. Two of these are *budith gahan* cases involving redemption of the respective lands without any charge after 8 and 3 years. In 4 cases it is ordinary mortgage with possession. In 2 cases the actual terms cannot be ascertained.

18. Nine are simple mortgages, the mortgagee in all these being the Aurangabad Co-operative Central Bank. Interest charged in all these cases is $12\frac{1}{2}$ per cent.

Money-lenders are—

in 9 cases	Aurangabad Co-operative Central Bank.
„ 5 cases	Marwadi sowcars.
and „ 4 cases	Mahratta raiyats.

19. Causes for the debts are :—

purchase of land	in	..	1 case
household expenses	„	..	1 „
marriage expenses	„	..	2 cases
prior debt	„	..	8 „
miscellaneous	„	..	2 „

In 4 cases the causes for the debts cannot be ascertained.

20. The debts are recorded in registered documents in 5 cases, on stamped paper in 2 cases, and on plain paper in 11 cases.

21. The debts have lasted for :—

10 years in	..	8 cases
8 „	..	1 case
5 „	..	1 „
4 „	..	2 cases
3 „	..	2 „
2 „	..	3 „
and 1 month in	..	1 case.

22. Accounts were settled in the 9 simple mortgages.

3 years ago in .. 2 cases

4 months ago ,, .. 7 ,,

B.G. Rs. 1,200 is due to the important land-grabbing Marwadi (excluding one case where the debt is not ascertainable).

Other Debt.

23. Thirty-one of the 79 resident families owe debts and 48 are debt-free. Of the 31, three owe only land mortgage debt. Twenty-eight families (of which 7 owe both kinds of debts) owe B.G. Rs. 10,736 and 28 Ahmednagar maunds of jawari, totalling up to B.G. Rs. 11,520. The non-mortgage debt per indebted family works at B.G. Rs. 411-6-10 nearly. The total debt distributed among all the resident families, would give B.G. Rs. 276-14-0 per family.

24. The village had a very poor kapas crop and only a few have made any payments to their sowcars. After the rabi jawari is threshed, several expect to make some payments. The debts as recorded indicate therefore the accumulated debt of previous years plus the debt incurred during the last agricultural season.

25. The 36 borrowings are secured

in 9 cases by personal security
and ,, 27 cases by crop ,,

26. Twenty-nine of the debts are recorded on stamped paper, three on plain paper, and four are oral agreements.

27. Classified according to sizes : —

debts of B.G. Rs. 1,000 and more are	..	4
do 500	do	.. 3
do 250	do	.. 9
do 100	do	.. 6
do less than 100	..	6

28. Interest charged is

100 per cent. in	..	1 case
50 do	..	5 cases
25 do	..	4 ,,
24 do	..	13 ,,
18 do	..	1 case
12 do	..	7 cases
and 9 do	..	2 ,,

29. In two cases no interest is charged as the debts are sundry. In one case, 10 per cent. is charged in addition to half the crop of the borrower's land (extent acres 30-0 dry land).

30. The 36 borrowings have lasted for :—

32 years in	..	1 borrowing
30 do	..	1 do
25 do	..	2 borrowings
10 do	..	2 do
8 do	..	8 do
7 do	..	1 borrowing
4 do	..	4 borrowings
3 do	..	1 borrowing
2 do	..	5 borrowings
1 year in	..	4 do
and 6 months in	..	5 do

Two debts are sundry.

31. Accounts were settled last

1 year ago in	..	21 cases
10 months ago in	..	5 „
8 do	..	1 case
6 do	6 cases
and 5 do	..	1 case

Two are sundry debts.

In cases in which accounts have not been settled even once after the original borrowings (on account of these being recent or for some other cause), the dates of the latter are considered as the respective dates of settling accounts.

32. Money-lenders are :—

Marwadi sowcars	in	24 borrowings
Marwadi grain dealer	..	4 do
Mahratta raiyats	..	5 do
Rajput mason	..	1 case

Two are sundry, due to several in each case.

33. Causes for the debts are—

household expenses in	.	11 cases
trade	..	3 „
cultivation expenses	..	6 „
purchase of bulls	..	1 case
purchase of clothes	..	1 „
prior debt	..	2 cases
marriage expenses	..	6 „
tenancy dues	..	1 case
and miscellaneous	..	5 cases

34. B.G. Rs. 4,050 out of B.G. Rs. 11,520 is productive debt. Of this 11,520 Rs. 6,507 is due to the Marwadi sowcar referred to under land transfers and land mortgage debt.

Seed Supply.

35. The majority borrow seed, and the interest charged is 50 per cent. in kind for the season.

How produce is disposed of

36. Kapas grown at Siri Saigaon goes to Lasur. Other crops all go to the Marwadis against interest and tenancy dues. Kapas and bajri are the kharif crops, jawari, wheat and Bengal-gram rabi crops. Grains and pulses are measured in Ahmednagar seers, one measure of which of jawari weighs 120 tolas.

General.

37. Milk supply is very poor. The staple grain is jawari, and the population has a healthy appearance. There is only one drinking water well which was constructed more than 30 years ago by public subscription. Even now the water is lifted throughout the day by 4 bulls and a *moat*, the expenses of which are financed by public contributions.

38. Statistics from village records (1339 F.) are :

bulls	.. 114
cows	.. 65
buffaloes	.. 14
sheep	.. 256
plough	.. 22
carts	.. 13

39. There is no cycle, no sewing machine. Five are literate in Mahrathi, none in Urdu or English.

40. The soil of Siri Saigaon is quite good and the people are promisingly diligent. But they lack in cheer on account of the land-grabbing to which they have been subjected during the past 30 years and on account of heavy debts. The "magic of property" is absent and the beginnings of poverty are distinctly visible.

HINGONI

(Vaijapur Taluqa).

Vaijapur Taluqa is surrounded by Bombay Presidency on the south and west (Ahmednagar and Nasik Districts). Hingoni is to the south-west of the Taluqa about a mile and a half from the British frontier. At the time of investigation the resident families number 66 (about 14 families are away on account of famine in this area : this year's jawari and bajri crops were very poor) and the population is 273.

Land Holdings.

2. The total area of Hingoni is acres 1609-30 which is distributed thus :

dry land	acres 1472-28
garden land	„ 67-25
phoot-kharab	„ 37-34
gavtan (village site)	„ 5- 8
roads, etc.	„ 5-38
channels, etc.	„ 20- 7

3. There are 36 pattadars. In 8 pattas, the lands are held by persons in no way related to the pattadars. The actual number of occupants is 78. The size of the average dry land holding works at

$$\text{acres } \frac{1472-38}{78} = \text{acres } 18-35 \text{ nearly,}$$

and of garden land

$$\text{acres } \frac{67-25}{9} = \text{acres } 7-21 \text{ nearly}$$

4. Forty-eight cultivate their lands, five of them cultivate portions of their lands. Thirty are non-cultivating occupants. Their details are—

sowcars	4
minor	1
patwari	1
coolies	14

Ten do nothing in particular.

5. Ten of the 48 cultivating occupants have additional occupations, two are jaggery makers, one is joshi, one a blacksmith and 6 are coolies. Thirty-eight raiyats depend entirely on cultivation.

6. Classification of occupants is as follows :—

				dry garden	
occupants holding	200 acres and more	..		1	0
"	100	"	..	1	0
"	75	"	..	0	0
"	50	"	..	2	0
"	40	"	..	3	0
"	35	"	..	1	0
"	30	"	..	5	0
"	28	"	..	1	0
"	25	"	..	2	1
"	22	"	..	2	0
"	20	"	..	2	0
"	.. 18	"	..	4	1
"	15	"	..	3	0
"	.. 12	"	..	9	0
"	10	"	..	9	0
"	8	"	..	2	1
"	5	"	..	3	0
"	2	"	..	3	2
"	less than 2 acres	"	..	25	4
Total				78	9

7. All the garden bits are held along with dry land. Twenty-four of the last class are mahars getting small shares in the inam land.

8. The cultivating occupants stand classified thus :—

				dry garden	
cultivating occupants holding	200 acres and more	..		0	0
"	100	"	..	0	0
"	75	"	..	0	0
"	50	"	..	1	0
"	40	"	..	2 +	0
			1 partly		
"	.. 35	"	..	1	0

			partly		
"	25	"	..	2	0
"	22	"	..	2	0
"	20	"	..	1	0
"	18	"	..	8	0
"	15	"	..	2	0

				dry	garden
cultivating occupants 12 acres and more..				4 +	0
holding				1 partly	
" 10 "			..	8	0
" 8 "			..	1	1
" 5 "			..	1	0
" 2 "				1 +	0
				1 partly	
" less than 2 acres			..	11	2
					partly
Total				.. 43 +	1 +
				5 partly	2 partly

9. Acres 639-23 dry land and 51-29 garden land were subjected to transfers during the past 25 years, as shown in the two accompanying statements. Acres 465-38 dry and 50-4 garden land which have been transferred from cultivating raiyats to persons belonging to non-cultivating classes and not actually cultivating constitutes 72·7 and 96·9 per cent. of the total of dry and garden land transfers. Of the 47 transactions, 7 are ordinary sales (in each of these, the buyer is a raiyat), 8 are mortgages with possession (conditional sale clause attached in 2 cases), and 32 cases are of iniquitous *bynamas* accompanied by hopes of the sellers that if they paid back the sale price, they would get the land back. In this village also, the prices entered in the sale-deeds are phenomenally high—about double of the alleged due from the land-losing raiyat, and the justification for this is that land increases in value year after year and the sowcar should get the price at which the land would sell at the time the land might be released (if released). A comparison of the two classifications of occupants and cultivating occupants shows that the bigger landholders are all non-cultivating. The two important Marwadi sowcar landowners own acres 280-14 and 26-9 garden land, and acres 134-39 dry land and 18-39 garden land respectively, all these extents finding place in the Land Transfers Statements.

10. Another new contrivance being widely resorted to by the non-cultivating occupants in this region is explained in the statement below :—

LIST OF HIRE-PURCHASE OF LAND ORALLY AGREED UPON, AT HINGONI.

Kha- tha No.	Sur- vey No.	EXTENT			Name of seller	Name of buyer	When oral agreement was entered into	Terms
		D.	W.	G.				
26	66	31-27	Rupchand Chagniram .	Maluba Sukdev	1 year ago .	B.G.Rs.200 paid in advance B.G. Rs. 1,200 to be paid within 6 years. Interest at 6% to be paid on yearly balance. Penal- ty for default, surrender of all claims on paid money and land.
	3	1-39	..	6-25 g	Rupchand Chagniram .	Ganapathi Bhikaji	1 year ago .	B. G. Rs. 100 paid in ad- vance. B. G. Rs. 600 to be paid within 6 years. 6% interest on yearly balance. Penalty for default, surrender of all claim on paid money and land.

6	9-30	..	4-7 g	Rupchand Chagniram	Shahadu Satwa	..	1 year ago	B. G. Rs. 200 paid in advance. B. G. Rs. 1,700 to be paid within 10 years. Interest at 6% on yearly balance. Penalty for default, surrender of all claims on paid money and land.
50	15-4	Rupchand Chagniram	Viswanath Shivram Kumbhar.	..	1 year ago	B. G. Rs. 300 paid in advance. B. G. Rs. 1,100 to be paid within 7 years. Interest at 6% on yearly balance. Penalty for default, surrender of all claims on paid money and land.
25	26-24	Rupchand Chagniram	Somaya Haba Mahar	..	1 year ago	B. G. Rs. 200 paid in advance. B. G. Rs. 1,300, to be paid within 8 years. Other terms as above.
67	22-10	Rupchand Chagniram	Revji Gangaram	..	2 years ago	Not ascertainable.

While in the O. M. F. S. (oral mortgage but formal sale) process, the sale is real and the mortgage is only oral in these cases the tenancy is real and the sale is oral. The cultivator who aspires to become occupant holds no record to show the terms of sale to which the seller is said to have agreed : no receipt is issued for any of the instalments paid, and the cultivator's only justification for becoming a party to such a transaction is the selling sowear's "mandar" (honesty). The advantages that accrue to the "seller" on account of these transactions are briefly :

1. the raiyat being told that he need not pay the sale price all at once, but in 6 or 7 annual instalments, is generally prepared to agree to a much bigger amount as price to pay than on cash terms.
2. the seller gets 6 per cent. on an amount which is much bigger than the market price of the land in question. The land revenue due being paid by the hire purchaser, real interest works at about 12 per cent. net and the seller considers this quite good tenancy due.
3. this arrangement ensures better maintenance and cultivation of the land, which the non-cultivating seller is most anxious about.
4. Any dislocation on either side (like death of the seller or buyer) turns out to be advantageous to the seller : if the seller died, his successor would naturally plead lack of information and want of documents : if the buyer died, it would be very easy for the seller to give a new version of the old agreement (the old agreement itself being an oral one with no witness or panchayat).

11. A careful examination of the concerned cases leads to the conclusion that these oral hire purchases are contrivances put up by the non-cultivating occupants with the sole object of getting the land properly maintained and cultivated. The crux of the seller's psychology appears to be—(just as in the O.M. F. S. cases) : "he (the raiyat) can never pay the prohibitive amount, but it is good to get him interested in the land."

12. It is not known what sort of entries (if any at all) are made by the marwadis in their khathas in such oral hire purchases. An attempt was made to see a marwadi's khatha, but he avoided inspection. In this particular village, all these oral hire purchase transactions occur only in one patta, but this tract is reported to abound in such

cases. Really speaking, the so-called buyers are tenants pure and simple, and they are considered as such in this Inquiry. These transactions in no way connote a tendency for land to get back from non-cultivators to cultivators : they are simply means resorted to for proper cultivation of, and good returns from, lands which belonged before this to cultivating raiyats but were bought by these sowcars by means which cannot by any means be called fair (namely, oral mortgage but formal sale). A study of the way in which survey Nos. 66, 3, 6, 50, 25 and 27 passed hand to hand and how they are at present orally hired out, should prove useful in gauging the general tendency.

13. Acres 7-29 is fallow. There are only 2 agricultural wells in use. Price of land is high, between B.G. Rs. 80 and 100 per acre of dry land and between B.G. Rs. 150 and 200 per acre of garden land. This shows the great demand for agricultural land.

Agricultural Tenancies.

14. Fifty tenancies comprise acres 740-36 dry land and 49-11 garden land, constituting 50·3 per cent. of total dry land and 72·9 per cent. of total garden land. Six are landless tenants.

15. Tenancy contracts are in money terms in 9 cases, in crop terms in 5 cases, in terms of both in 30 cases. In 5 cases, the cultivators till on the oral hire purchase arrangements. In one case the terms of tenancy are not ascertainable.

Tenancy contracts (excluding the latter 6 cases) are

for 12 years in	.. 1 case
for 6 years „	.. 1 „
for 11 months	.. 42 cases

The concerned tenants have been on their lands.

for 15 years in	.. 2 cases
for 12 years „	.. 1 case
for 10 years „	.. 1 „
for 8 year „	.. 2 cases
for 7 years „	.. 1 case
for 6 years „	.. 1 „
for 5 years „	.. 1 „
for 4 years „	.. 3 cases
for 3 years „	.. 5 „
for 2 years „	.. 8 „
and for 1 year „	.. 25 „

Agricultural Labourers.

16. Of the 66 resident families, 37 have no land either as occupants or as tenants. They earn their livelihood in the following ways :—

Government servants	6
beggars	3
barber	1
grocer	1
cobbler	1
coolies	25

Of these, 18 are mahar and mong families.

17. Wages are paid only in money : men get B.G. annas five per day, women annas three per day. Agricultural “nowkers” get about B.G. Rs. 80 plus food and clothing per year.

Land Mortgage Debt.

18. There are 9 cases. Extent of land mortgaged is acres 144–1 dry land and acres 1–25 garden land, estimated at B.G. Rs. 11,700. The mortgage debt is B.G. Rs. 3,335 (apart from 2 cases where the debt is not ascertainable).

19. Seven are mortgages with possession, two ordinary (thabe gahen), two to be redeemed after 34 and 5 years respectively without any charge (budith gahen), two are mortgages with possession with conditional sale clause attached, and one is redeemable on payment of principal only after 5 years. Two are simple mortgages. Both are instalment loans.

20. Two of the transactions are on registered documents, 5 are on stamped paper, one is on oral agreement, and in one case the nature of the document cannot be ascertained.

21. Money-lenders are—

Marwadi sowcars in	..	3 cases
Gujarathi sowcar „	..	2 „
Deccani Mohammadan grain-seller		1 case
Mahratta raiyat in	..	1 „
Mahar raiyat „	..	1 „
and a Mahratta blacksmith in		1 „

22. The causes for the 9 debts are—

marriage expenses	„	..	2 cases
prior debt ..	„	..	3 „
payment of land revenue	„	..	1 case
household expenses ..	„	..	1 „
and not ascertainable	„	..	2 cases

23. The mortgages have lasted for

16 years in	.. 1 case
10 ,,	.. 1 ,,
7 ,,	.. 2 cases
3 ,,	.. 3 ,,
and 1 year ,,	.. 2 ,,

Other Debt.

24. Nineteen out of 66 families are indebted : 5 owe land mortgage debt only. The non-mortgage debt of 14 families amounts to B.G. Rs. 4,916 (including the cash price of 18 maunds 32 seers of jawari, 48 seers of bajri and 4 khandies of wheat). The average debt per indebted family works at B.G. Rs. 351-2-3 nearly. The year's crop was very poor and so few have made payments to sowcars. The debt therefore represents the sum total of previous years' accumulations and the current year's borrowings. The total debt of both kinds distributed among all the 66 resident families would give each family a debt of B.G. Rs. 125-0-2 nearly.

25. The 20 borrowings are—

on personal security in	.. 4 cases
and on crop security ,,	.. 16 ,,

26. Fifteen of the debts are on stamped paper, 3 on plain paper, one is oral. One is on a decree of a court of law.

27. The 14 debts are—

B.G. Rs.	
1,000 and more in	.. 1 case
500 ,,	.. 2 cases
250 ,,	.. 4 ,,
100 ,,	.. 1 case
and less than 100 in..	6 cases

28. Rates of real interest charged are—

100 per cent. in	.. 2 cases
75 ,,	.. 1 case
50 ,,	.. 6 cases
25 ,,	.. 1 case
24 ,,	.. 8 cases
18 ,,	.. 1 case
6 ,,	.. 1 ,,

29. The borrowings have lasted for—

20 years in	.. 1 case
12 „	.. 3 cases
8 „	.. 1 case
6 „	.. 1 „
4 „	.. 1 „
3 „	.. 1 „
1 year in	.. 3 cases
9 months in	.. 2 „
6 „	.. 5 „
4 „	.. 1 case
and 2 „	.. 1 „

30. Accounts were settled last---

8 years ago in	2 cases
2 „	.. 3 „
1 year ago in	.. 6 „
9 months ago in	.. 2 „
6 „	.. 5 „
4 „	.. 1 case
and 2 „	.. 1 „

In cases in which accounts have not been settled even once after the original borrowings (on account of these being recent or for some other cause), the dates of the latter are considered as the respective dates of settling accounts.

31. Money-lenders are—

Rajput sowcar-clerk in	.. 5 cases
Marwadi sowcars „	.. 4 „
Gujarathi sowcar „	.. 6 „
Rohilla sowcars „	.. 2 „
and a Brahman sowcar in „	.. 3 „

32. The causes for the 20 borrowings are—

household expenses in	.. 11 cases
cultivation expenses „	.. 1 case
purchase of bulls „	.. 2 cases
prior debt in „	.. 3 „
tenancy dues „	.. 1 case
and not ascertainable „	.. 2 cases

33. B.G. Rs. 585 out of B.G. Rs. 4,916 is productive debt. Of B.G. Rs. 4,916 B.G. Rs. 3,187 is due to one Marwadi sowcar who is the biggest landholder and occurs most times in the Land Transfers Statement.

Seed Supply.

34. Most of the raiyats borrow seed. The general rate charged is 50 per cent. for the season.

How produce is disposed of.

35. Kharif crops are bajri and kapas, and wheat, Bengal gram and jawari are rabi. All grains are measured in the Ahmednagar "mop" (4 measures=1 paili, 16 pailis=1 maund, 20 maunds=1 khandi).

36. Kapas goes to Latur, a station on the Hyderabad-Godavery Valley Railway. There is very little export of grain except to non-resident non-cultivating landowners who get the bulk of the produce.

General.

37. Milk supply is very poor. The people use more of wheat for their food than jawari or bajri (the latter two having become very dear on account of poor crop). The wheat grown is of good variety, but the people are very poor. The population is not suffering from any disease but is generally hungry-looking. They lack in vigour and cheer. There is no bicycle, no sewing machine.

38. Statistics from village records (1339 F.) are :—

bulls	..	107
cows	..	64
buffaloes	..	2
goats	..	294
ploughs	..	18
carts	..	36

39. Twelve are literate in Mahrathi. No one knows Urdu or English. Seven are professional litigants.

40. Hingoni puts on a sad appearance : the village is being bled white by absentee sowcar-landgrabbers. The soil is good, but many families have left for neighbouring villages in British India, and this process of migration tends to be on the increase. It is difficult to attribute any one cause for tendencies in social matters, but it can be confidently said that the main cause for the adversity of Hingoni is the "dispossession of the swain"

BORSAR BUZURG.

(Kannar Taluqa.)

Immediately to the north of Vaijapur Taluqa, Borsar is about 8 miles from Nasik District frontier. Part of the way lies along the road from Vaijapur to Nasik. There is a brooklet called "Shiv nadi" on one side of which is Borsar khalsa, on the other side Borsar jagir.

2. Resident families number 81, the population being 360.

Land Holdings.

3. The area of the village is distributed thus :—

	Acres
dry land	.. 1479- 8
garden land	.. 14-33
village roads, etc.	.. 5-38
site of the village	.. 6-28
phoot-kharab	.. 63-37
rivers, etc.	.. 110-15
Total area	.. 1680-39

4. Pattadars are 35 in number. In 10 pattas, the land sare held by persons in no way related to the pattadar. The actual number of occupants is 48, out of whom 40 cultivate their lands (7 partly) and 8 are non-cultivators.

Details of these 8 are :—

glassware seller	..	1
patwari	..	1
sowcar	..	1
joshi	..	1
do-nothings	..	4

5. Of the 40 cultivating occupants, four pursue agriculture as a subsidiary occupation, their main professions being sowcari in 2 cases, patwari work in 1 case and sowcar's clerk work in 1 case. Only 3 have subsidiary occupations, one being a police patel, one a sowcar and one a coolie. Thirty-three depend entirely on cultivation.

6. The 48 occupants are classified thus :—

occupants holdings	300 acres and more	..	1	0
„	200	„	0	0
„	100	„	4	0
„	75	„	1	0
„	50	„	0	0

„ 5 „	..	2	1
„ 2 „	..	11	1
			partly
„ less than 2 acres	..	1	1
		33	2
		7 partly	1 partly

8. The four landholders belonging to the first and third classes and partly cultivating their lands, are strictly speaking non-cultivators. There is no accounting for their lands in the Table on Agricultural Tenancies because the portions of their lands they are managing themselves respectively are being actually cultivated by servants employed by the year. Albeit, they may be said to be pursuing agriculture (and not cultivation as a subsidiary profession). Of these four, three are Brahmins and one a Lingayat.

The sizes of average holdings work at

$$\text{acres } \frac{1479-8}{48} = \text{dry land acres 30-33 nearly.}$$

and

$$\text{acres } \frac{14-33}{7} = \text{garden land acres 2-5 nearly.}$$

The size of the average dry land holding is not real because the bulk of land is locked up in the hands of a few big landholders who are generally non-cultivating sowcars.

9. The accompanying land transfer statements show acres 396-6 dry land and 2-0 garden land as subjected to transfer of hands during the past 25 years. It is interesting to see that while acres 156-13 dry land passed from cultivating landholders to non-cultivating landholders, acres 105-2 passed hands in the reverse process. This is typical of the fact that the tendency for transfer of land from non-agricultural to cultivating classes is there, though it is much less obtaining than the other process of peasant raiyats giving place to absentee landholders.

10. Of the 48 transactions, 15 are ordinary sales, 8 are ordinary mortgages with possession and 25 are oral mortgages but formal sales. The three big Brahmin landholders and one Lingayat landholder are mostly responsible for these 25 O. M. F. S. (oral mortgage but formal sale) transactions.

11. In the case of one of these, the original owners offered to pay back the sum due according to oral contract, but the sale-deed holder refused on the ground of lack of records with him, his father having died without telling him anything about these transactions. The result is that 3 out of 8 survey numbers which he holds in the village, are lying fallow (the sale-deed holder all the time paying land revenue) on account of the concerned original owners not allowing cultivation by him or his agents. Their cause is morally just, but law does not give them justice. They have taken to the other course of preventing cultivation.

12. There is no case of "oral sale and real tenancy" in this village but raiyats report that such cases abound in the neighbourhood, specially in jagir areas.

13. Acres 129-36 is fallow, partly on account of family disputes, partly on account of disputes between raiyats and sowcars. Competition for land is very keen, and the price of land varies between B.G. Rs. 120 and 200 per acre. There are 3 agricultural wells all in good condition.

	Grand total	396-6d	..	2-0g						

Agricultural Tenancies.

14. Thirty tenancies comprise acres 403-10 dry land, constituting 27·3 per cent. of total dry land area. There is no landless tenant. All the tenancies are written agreements. There are in money terms, 27 in terms of crop. The 9 contracts are for:—

5 years in	.. 1 case
1 year „	.. 29 cases

The concerned raiyats have been on the lands for —

7 years in	.. 1 case
6 „ „	.. 1 „
4 „ „	.. 10 cases
3 „ „	.. 1 case
2 „ „	.. 10 cases
and 1 year	.. 7 „

Agricultural Labourers.

15. Of the 81 resident families, 34 are landless and tenancyless. Their details are:—

barber	..	1
oil-mongers	..	3
Government servants	..	2
potters	..	2
grocer	..	1
carpenter	..	1
beggars	..	2
confectioner	..	1
washerman	..	1
bangle-sellers	..	2
coolies	..	18

Of these 11 are mahar and mong families.

16. Wages are paid mostly in money: B.G. annas 6 per day for men and annas 3 per day for women. B.G. Rs. 125 is the usual payment for agricultural “nowkers” working by the year.

Land Mortgage Debt.

17. There are 10 land mortgages, the extent of land involved being acres 75-32 dry land (plus survey No. 30 of Gandagon village) estimated at B.G. Rs. 9,840. The mortgage debt is B.G. Rs. 6,117.

18. Nine are mortgages with possession, to none of which the conditional sale clause is attached. One is a simple mortgage for the balance of sale price yet to be paid by the

new buyer. No interest is charged in this case as the money has to be paid within one year from date of execution of sale-deed.

19. Four are stamped documents and six are registered documents.

20. Money-lenders are—

Mahratta sowcars in	..	2 cases
Mahratta raiyats „	..	5 „
Brahman sowcar „	..	2 „
and a Mahratta coolie „	..	1 case

21. Causes for the debts are—

marriage expenses in	..	4 cases
litigation „	..	1 case
purchas of land „	..	1 „
prior debt „	..	3 cases

In one case, the cause is not ascertainable.

22. These debts have lasted for—

20 years in	..	1 case
17 „	..	1 „
12 „	..	1 „
11 „	..	1 „
10 „	..	1 „
5 „	..	1 „
4 „	..	1 „
2 „	..	1 „
and 1 year „	..	2 cases

Other Debts.

23. Fifty of the 81 families are indebted : two owe land mortgage debt only. Four owe both kinds of debts. The non-mortgage debt of 48 families amounts to B.G. Rs. 8,523-8-0 (including the money value of $78\frac{1}{2}$ maunds of jawari, 8 pails of alasi, 8 pails of karad, and $9\frac{3}{4}$ maunds of wheat). The average debt per indebted family works at B.G. Rs. 177-9-2 nearly.

24. The non-mortgage debt of Borsar is not so heavy as of Hingoni. Many of the indebted families have not yet made their annual payments and so this average of B.G. Rs. 177-9-2 includes a good portion of the current year's borrowings in addition to the previous year's accumulations.

25. The whole debt of the village distributed among all the families work at an incidence of B.G. Rs. 180-11-11 nearly.

26. The 48 debts consist of 66 borrowings which are based

33 on personal security.

31 „ crop „

and 2 „ house „

27. Forty-four of the borrowings are recorded on stamped paper, six on plain paper: fourteen borrowings are on oral agreement. In two cases debts are due against decrees of courts of law.

28. According to size, the debts are—

1,000 and more in .. 1 case

500 „ .. 2 cases

250 „ .. 8 „

100 „ .. 12 „

and less than 100 .. 25 „

29. Rates of real interest charged are—

100 per cent. in .. 1 borrowing

50 „ .. 5 borrowings

25 „ .. 6 „

25 „ .. 29 „

18 „ .. 6 „

15 „ .. 2 „

and 12 „ .. 3 „

30. In 14 cases no interest is charged : 6 of them are instalment loans, 2 business loans, one a tenancy due and 5 are sundry.

31. The borrowings have lasted for—

14 years in .. 1 case

12 „ .. 1 „

10 „ .. 4 cases

7 „ .. 1 case

5 „ .. 2 cases

4 „ .. 1 case

3 „ .. 3 cases

2 „ .. 12 „

1 year „ .. 26 „

11 months „ .. 1 case

10 months „ .. 1 „

8 „ .. 3 cases

7 „ .. 1 case

4 „ .. 2 cases

3 „ .. 1 case

2 „ .. 3 cases

and for 1 month in .. 2 „

One is a sundry debt.

32. Accounts were settled last—

5 year ago in	.. 2 cases
3 " "	.. 1 case
2 " "	.. 12 cases
1 year ago "	.. 32 "
and less than 1 year ago in	.. 18 "

One is a sundry debt.

In cases in which accounts have not been settled even once after the original borrowings (on account of these being recent or for some other cause), the dates of the latter are considered as the respective dates of settling accounts.

33. Money-lenders are—

Mahratta sowcars in	.. 16 borrowings
" rai'yats	.. 13 "
" oil-monger	.. 1 case
Brahmin sowcars	.. 34 borrowings

and a Deccani Mohamedan raiyat in 1 case

One is a sundry debt.

34. Causes for the 65 borrowings (excluding the sundry debt are—

purchase of bulls	in	.. 2 cases
purchase of asses	"	.. 1 case
purchase of clothes	"	.. 1 "
purchase of seed	"	.. 2 cases
prior debt	"	.. 3 cases
land revenue payment	"	.. 1 case
marriage expenses	"	.. 8 cases
tenancy dues	"	.. 1 case
business	"	.. 10 cases
and household expenses	"	.. 34 "

Two are hereditary debts.

35. B.G. Rs. 1,978 out of B.G. Rs. 8,523-8-0 is productive debt.

36. Debts due to the two important Brahmin sowcars amount respectively to B.G. Rs. 2,298 and Rs. 2,340. B.G. Rs. 1,603-8-0 is due to a Mahratta raiyat who does money-lending as a subsidiary business.

Seed Supply.

37. Majority borrow seed, and the interest charged generally is 50 per cent. in kind for the season.

How produce is disposed of.

38. Kharif is about 3 annas of the crop, rabi 13 annas. Kapas and bajri are grown as kharif crops; wheat, jawari, Bengal-gram and kardi are grown as rabi crops. The kapas was till recently all going to Aurangabad, but nowadays some of it goes to Lasur on the Hyderabad Godavary Valley Railway. For grains, they use the "Shivur" measure weighing about 83 tolas.

General.

39. Milk supply is very poor. People use water from the brook nearby (or pits dug in the bed of the brook during summer). There is some malaria. A good number of the raiyats use wheat in their daily fare. Many of the raiyats keep tea and sugar for entertaining friends and visitors, though few use these things daily. In clothing also, the well-to-do raiyats show some advance: many of them have costly *pagrees* (head dress). Nana Girija, though stone deaf from his birth, is a striking specimen of the acuteness and penetration the Mahratta raiyat is capable of (given opportunity): he knows all about the village, people with doubts or disputes all go to him for his decision: he remembers the old (previous to revision) and new survey numbers of every bit of agricultural land, lives decently and maintains a tonga and pony for his use.

40. Statistics from village records (1339 F.) are—

bulls	110
cows	140
buffaloes	15
sheep and goats	289
ploughs	15
carts	16

41. There is no bicycle nor sewing machine. Twenty-three are literate in Mahrathi none in Urdu and one in English. There are four professional litigants.

42. Soil is good: there are a large number of mango-trees of good variety, the people are not unhealthy, but they find no elbow room. No land is available for the enterprising young raiyat of Borsar unless as a tenant or a nowker.

KHADKHEDA.

(Kannar Taluqa).

About 15 miles to the north of Kannar Town, this village is located in hilly tract : more than half of the Taluqa to the north is hilly, and certain bits near the frontier are practically inaccessible. At the time of investigation, the resident families number 77 and the population is 450.

Land Holdings.

2. The area of the village is distributed thus :—

	Acres
dry land	1135-14
garden land	42-13
village site	5-29
rivers, channels, etc. ..	25- 7
unsuitable for cultivation, gairan, etc.	1330- 9

Total area ..	2538-32
---------------	---------

3. Pattadars number 31. In 7 pattas the pattadars or their heirs hold no portion of the respective lands. Actual occupants number 69. The size of the average holdings work at

$$\text{acres } \frac{1135-14}{69} = \text{dry land acres } 16-18 \text{ nearly.}$$

$$\text{acres } \frac{42-13}{17} = \text{garden land } 2-17 \text{ nearly.}$$

4. Occupants are classified as follows according to the sizes of their holdings :—

occupants holding	100 acres and more	dry	garden
..	0	0	0
..	1	0	0
..	2	0	0
..	4	0	0
..	1	0	0
..	1	0	0
..	2	0	0
..	1	0	0
..	6	0	0
..	2	0	0

		dry	garden
occupants holding	18 acres and more ..	2	0
„	15 „ ..	6	0
„	12 „ ..	6	0
„	10 „ ..	6	0
„	8 „ ..	4	1
„	5 „ ..	5	0
„	2 „ ..	13	7
„	less than 2 acres ..	7	9
Total ..		69	17

All the garden bits are held along with dry land.

5. Sixty-two are cultivating owners and 7 non-cultivating. Of these 7, one is a woman, one a sowcar and 2 coolies. Three are do-nothings.

6. Nine of the cultivating occupants have additional occupations : one is a mali and police patel, one an excise contractor. Two sowcars, one mulla, one jaggery-maker, one joshi and two beggars. Fifty-three depend entirely on cultivation.

7. Cultivating occupants are classified thus :—

		dry	garden
cultivating occupants holding	100 acres and more ..	0	0
„	75 „ ..	1	0
„	50 „ ..	1	0
„	40 „ ..	4	0
„	35 „ ..	1	0

„	8 „ ..	4	1
„	5 „ ..	5	0
„	2 „ ..	12	7
„	less than 2 acres ..	3	8
Total ..		62	16

8. Acres 189-19 dry land and 4-18 garden land passed hands during the last 25 years. It is only in four out of eleven cases that debts led to unjust sales: five of the survey numbers were regularly sold for cash and the transfer to non-cultivating owners is not much. This must be due to the fact that villages in this region are not attractive to outside enterprise on account of difficulties of communication: from Kanar to Khadkheda, people must either walk or go on horseback in certain places—no carts can go. The case is similar to that of Kallali Rui of Kandhar Taluqa (Nanded District) which is comparatively free from the heavy hand of the Kandhar sowcars on account of its comparative inaccessibility.

27	45	22-39	Sakaram Yadaba	Pathushah Gulabshah Fakir.	3	cash sale.
		189-19 d. 4-18 g.						

9. Acres 16–29 is fallow on account of infertility. There are 9 agricultural wells of which 7 are in good condition. The price of dry land varies from B.G. Rs. 60 to B.G. Rs. 80, and the price of garden land varies from B.G. Rs. 90 to B.G. Rs. 110.

Agricultural Tenancies.

10. Six tenancies comprise acres 111–28 of dry land and 1–0 garden land, constituting 9·8 and 2·4 per cent. respectively of total dry and garden areas. Five of the tenants are landless. The contracts are five in money terms and one in terms of crop. The contracts are for 18 years in one case, for 11 years in one case, for 7 years in 2 cases and for one year in 2 cases. The concerned tenants have been on the lands for 25 years in one case, for 3 years in one case, and for 2 years in four cases. All the tenancies are written on plain paper.

Agricultural Labourers.

11. Thirty-one of the 77 resident families are landless and tenancyless. They are engaged as cobblers in 5 cases, and coolies in 25 cases, one is a dependent family. Of these 31, 10 are mahar and 3 mong families.

12. Men get B.G. annas 6 per day and women 3 annas. Wages are paid in kind during harvest time. B.G. Rs. 50 to 60 with food is the usual pay of an agricultural nowker per year.

Land Mortgage Debt.

13. There is only one land mortgage, the extent of mortgaged land being acres 15–6 dry land estimated at B.G. Rs. 850. The debt is B.G. Rs. 800. It is a case of mortgage with possession with conditional sale clause (7 years) attached to it. The debt was incurred 2 years ago and the document is registered. The lender is a Mahratta raiyat and the borrowing was for marriage expenses.

Other Debt.

14. Fifteen of the 77 families owe non-land mortgage debt, one of which owes both this kind of debt and land mortgage debt. *Sixty-two families are debt-free.* The total non-land mortgage debt is B.G. Rs. 7,300, yielding an

average of B.G. Rs. 486-10-8 per indebted family. Distributed among all the resident families, the whole debt of the village would work at B.G. Rs. 105-3-1 per family. The incidence of debt is high, but it is only in 4 out of 17 borrowings the raiyats have yet made their annual payments. So this debt represents the sum total of the season's borrowings and accumulated debt of previous years.

15. Four of the borrowings are based on personal security, 12 on crop security and one on house security.

16. Two of the transactions are oral, one is written on plain paper and 14 on stamped paper.

17. The 15 debts are—

B.G. Rs.

1,000 and more in	.. 3 cases
500 ,	.. 4 „
250 „	.. 3 „
100 „	.. 2 „
less than B.G. Rs. 100	.. 3 „

18. Interest is being charged at—

50 per cent. in	.. 1 case
25 „	.. 2 cases
24 „	.. 5 „
15 „	.. 1 case
12 „	.. 2 cases

No interest is being charged in 1 case. Five are instalment loans.

19. The debts have lasted for—

50 years in	.. 1 case
25 „	.. 1 „
16 „	.. 1 „
15 „	.. 6 cases
12 „	.. 1 case
9 „	.. 1 „
6 „	.. 1 „
5 „	.. 1 „
2 „	.. 1 „
and 1 year in	.. 3 cases

20. Accounts were settled last—

15 years ago in	.. 1 case.
3 „	.. 1 „
2 „	.. 3 cases
1 year ago in	.. 8

6 months ago in	.. 2
4	.. 1 case
2	1 „

In cases in which accounts have not been settled even once after the original borrowings (on account of these being recent or for some other cause), the dates of the latter are considered as the respective dates of settling accounts.

21. Money-lenders are—

Mahratta raiyats in	.. 15 cases
a Mohamedan faqir	.. 1 case
and a Marwadi sowcar in	.. 1 „

22. The causes for the 17 borrowings are—

household expenses „	.. 7 cases
marriage expenses „	.. 3 „
accumulation „	.. 1 case
cultivation expenses	.. 3 cases
purchase of land „	.. 1 case
and miscellaneous „	.. 2 cases

23. B.G. Rs. 3,250 out of B.G. Rs. 7,300 is productive debt. Of B.G. Rs. 7,300 B.G. Rs. 6,200 is due to a Mahratta raiyat living in a neighbouring village.

Seed Supply.

24. Majority preserve seed.

How produce is disposed of.

25. Main crops are kapas and bajri (kharif) and jawari and wheat (rabi). There is little export. Kapas is taken by the raiyats to Kanar.

General.

26. Milk supply is rather poor. There is only one drinking water well used by all the villagers, and it is in good condition. The well is worked on co-operative lines. The health of the population is quite good, though the raiyats are backward in understanding.

27. Statistics from village records (1339 F.) are—

bulls	..	206
cows	..	90
buffaloes	..	41
goats and sheep	..	72
ploughs	..	34
carts	..	12

28. There is no cycle nor sewing machine. Eight persons are literate in Mahrathi : no one knows Urdu or English. Two are litigants.

29. The northern half of Kanar very urgently requires a number of cross-roads connecting the Khandesh road to the west and the Ajanta road to the east. This would no doubt mean heavy outlay : per mile of road here, about 6 times the ordinary amount would have to be spent. But this region urgently requires these roads both for protection and for production.
